4th Avenue at 13th Street  
Stuyvesant 7000

Fourth Avenue at 13th Street also at 57th Street—145-147 East

**FOREWORD**

Working with tools is an interesting and fascinating pastime. Many beginners, however, have made the error of purchasing poor or mediocre quality, not realizing that regardless of skill a good job cannot be done with poor tools, and that to approach the finished work of a skilled mechanic, one should acquire and use the same high grade tools.

Considered from the standpoint of genuine utility, good tools are a real economy, for with proper care, they remain a source of pride and satisfaction long after the mediocre article has been cast aside.

This catalog is not intended to present our full lines, but is an abridged edition compiled especially for the use of those who buy tools in smaller quantities for general home use or for pastime or hobby. We carry in stock upward of 125,000 odd items of tools, hardware and supplies.

As one who appreciates the value of really good tools you will need no introduction to such nationally known brands as Disston Saws, Russell Jennings Auger Bits, Buck Bros. Chisels and Gouges, Hammond Hammers, Yankee Tools, Stanley Planes, Nicholson Files, Millers Falls Bit Braces and the other equally well known brands we present herein for your consideration. One and all, they are the same "Trade Marked" tools which we sell every day to critical skilled mechanics—each tool worthy to be in the kit or on the bench of the most expert artisan.

We reserve the right to make substitutions on any items specified in our tool outfits, or individual tools, etc., where styles, models or numbers have been discontinued or changed.

It is our aim to make your shopping easy, to make "Hammacher, Schlemmer" your headquarters, and for this purpose we have listed in this catalog only such items as are regularly carried in stock by us. We cheerfully invite you to call on us when in doubt about selecting tools especially adapted for certain kinds of work that you may be doing.

For eighty years we have made a constant study of the tool needs of skilled mechanics, and we are proud of our reputation for high grade tools. Many of our oldest customers are skilled artisans who rely on our recommendation.

You may order by mail with the full assurance that your needs will be given the same careful attention as if you had made a personal selection in our store.

**Guarantee**

We warrant all merchandise purchased from us to be perfect and to be free from flaw, and to do the work for which it is recommended. We will replace any that proves defective.

**HAMMACHER, SCHLEMMER & CO.**

**SPECIAL INSTRUCTIONS**

Before you order, study carefully all details enumerated in this catalog. Indicate carefully catalog number, size and kind of article. Any point omitted often necessitates correspondence and loss of time and frequently delays shipment.

**Shipping Instructions**

Please indicate your preference as to freight, express or parcel post. Where no instructions are given, we will use our best judgment, taking into consideration shipping weight, distance, and your interests.

All goods are sold f. o. b. New York, but we prepay transportation charges on all items in this catalog to points within 100 miles of New York.

**Terms**

Remittance including an approximate amount to pay postage should accompany all orders unless credit has been established. C. O. D. orders will be accepted provided an amount equal to approximately one-quarter of the value of the retail price accompanies the order. Remittance should be made with Post Office or Express Money Orders. We will, however, accept personal or firm checks if makers are known to us.

**Goods to be Returned**

All regular stock goods are returnable if unused provided such return is arranged for before the goods are reshipped to us. If goods are in original packages and in salable condition, we will promptly refund the price thereof if paid for in advance, or give full credit where goods were charged, when returned prepaid.

**HAMMACHER, SCHLEMMER & CO.**

Points to inch.....	10	10, 11	7, 8, 9, 10, 11
Each .....	\$5.25	5.30	5.50
<b>No. D115 Rip</b> —26 inches; 5½ and 6 points.....	Each \$5.50		

**No. D17—Double Duty, Regular Pattern, Skew Back, Beechwood Handle, Brass Screws**

The combination of teeth in this saw, alternate sections of five regular cross-cutting teeth and two ripping teeth, are separated by numerous deep gullets for full clearance. This insures free running, easy, very rapid and clean cutting in heavy work, whether cross-cutting or ripping, and especially for sawing diagonally across the grain, as its name implies. Particularly adapted for general construction work of all kinds, studding-up houses, shoring for sewers, making forms for concrete buildings, railroad work, etc.

<b>No. D17</b> —Length of blade 26 inches.....	Each \$3.55
--	-------------

## Gnome Brand

**Regular Pattern, Skew Back**

# NESTS OF SAWS

Disston

## With Pruning Blade

A nest or combination of saws for general use. Beech handle, varnished edges, equipped with a special adjustable lever tightener to take in blades of different thicknesses. Special temper Disston-made steel blades.

No. 3—Combining one each keyhole blade 10 inch, compass blade 14 inch, pruning blade 16 inch, handle and tightener..Per Set \$1.75

## Extra Parts for No. 3 Nests of Saws

	Each
Handle and tightener.....	\$0.35
Keyhole blade, 10 inch.....	.35
Compass blade, 14 inch.....	.40
Pruning blade, 16 inch.....	.76

# PLUMBERS SAWS

Disston

## For Wood or Metal

Beech handle, varnished edges, three brass screws. One edge toothed 6 points; the other 8 points. The coarse teeth are for sawing wood. The fine teeth for sawing wood in which nails are imbedded, lead pipe, etc.

No. 6—Blade 16 inch..Each \$1.35

# COMPASS SAWS

Disston

## For Wood

Crucible steel blade; applewood handle, brass screws.

No. 2—Blade, in.. 10 12 14  
Each ..... \$0.85 .90 .95

# COMPASS SAWS

Disston

Plunger Adjustment

Square Top Handle

## For Wood; Applewood Handle, Weatherproof Finish

The plunger adjustment makes reversal or replacement of blade quick and easy; no screws or levers to tighten. A slight pressure of plunger releases blade; plunger returns to position automatically. Square top handle enables the user to do close cutting, molding, siding, floor work, etc., in either regular or reverse position of blade.

Taper ground Disston saw steel blade, extra high polish, 8 points to the inch. The taper grind insures easier cutting, better and faster work.

No. 115A—Length of blade, inches..... 12 14  
Each ..... \$1.00 1.10

## MITRE BOXES

Gem Folding

Open

Closed

### Adjustable Saw Guides

These mitre boxes are strong, simple and compact and occupy a small space in the tool box. The guides are absolutely true and are easily and quickly adjusted. They are adapted to any size or style of hand or back saws.

No. 1G—Length 14 inches; height of back 3 inches; takes mouldings up to  $2\frac{1}{2}$  inches; weight each 4 pounds.....Each \$2.00

## STANLEY MARSH MITRE TOOLS

### No. 100 Mitre Machine

A strong and compact tool originally designed for the joining of picture frames; but now used extensively for all classes of woodwork. Any type of mitered joint may be readily cut, glued and nailed; and close, tight-fitting corners can be assured.

Mouldings less than  $4\frac{1}{2}$  in. wide can be sawed and any frame  $7\frac{1}{2} \times 7\frac{1}{2}$  in. or larger can be clamped. The  $7\frac{1}{2}$  in. clamping capacity insures accuracy in sawing large frames.

Saw is of highest quality and carefully fitted to machine. Machine made entirely of metal and japanned. Weight 23 pounds.

No. 100—With  $26 \times 4\frac{1}{2}$  inch saw. ....Each \$16 00

No. 101—Without saw.....Each \$12.45

One in a case.

### No. 400 Mitre Vise

The mitre vise meets every requirement of a picture frame clamp for square corners. The jaws hold the two sides of the frame firmly in position for nailing. Provision is made for resawing the joint if it does not make up tight.

It will clamp any type or width of moulding less than 4 inches wide and join any frame larger than  $3\frac{1}{2} \times 3\frac{1}{2}$  inches. It has the universal base of the mitre machine allowing the frame to be swung or tipped in any position.

No. 400—Cast iron frame, black japanned; weight 12 pounds....  
...Each \$7.00

One in a case.

Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect

## MITRE BOXES

## Improved Langdon Acme

## With Saw

Iron and steel castings; main castings enameled black; steel bed plates enameled red; bright parts nickel plated. Has thumb lever at front so saw supports can be swung freely and locked at either a positive or any intermediate angle. Graduated arc and index plate to show what degrees to set the saw for certain cuts. Notched bed plate determines the positive angles most used. Extension lever for quick acting adjustment on all except size 1 boxes. Length and depth gauges. Steel bottom boards roughened to prevent work from slipping.

## Size No. 1, with 22x4 inch Saw

No. 68—Capacity at right angles 7½ in.; capacity at mitre 5 in.; net weight 23 lbs., weight boxed 34 lbs.....Each \$15.40

## Size No. 2, with 24x4 inch Saw

No. 72—Capacity at right angles 10¼ in.; capacity at mitre 7 in.; net weight 23½ lbs; weight boxed 35 lbs.....Each \$17.30

## Size No. 2½, with 30x5 inch Saw

No. 75—Capacity at right angles 10¼ in.; capacity at mitre 7 in.; net weight 25½ lbs., weight boxed 38 lbs.....Each \$21.10

## Langdon

## With Saw

Easily portable and especially adapted to cutting mouldings and other light work. Guaranteed accurate.

Saw supports may be quickly swung and clamped at any angle from 45 to 90 degrees either right or left, notches being cut in the base plate at the angles most used.

## Size C, with 16x2½ inch Saw

No. 15½—Capacity at right angles 4½ in.; capacity at mitre 3 in.; net weight 8 lbs., weight boxed 14 lbs.....Each \$9.60

## Stanley Open Front

## Without Saw

Will take stock up to 4 in. high and boards of extra width can be sawed at any angle between 45 and 90 degrees. Saw guide can be adjusted for any thickness of saw as well as vertically to the base and saw can be adjusted square with the back.

No. 150—Takes any ordinary hand or panel saw; weight each 15 pounds .....Each \$5.40

Prices Subject to Market Changes

## SKILSAWS

Base-adjustable for depth of cut desired. Universal motor specially designed for operating on alternating or direct current. Aluminum body. Chrome nickel steel shaft and gears. Ball bearings throughout. Kerf guide and approved safety guard.

Standard equipment includes: One combination rip and cut-off saw blade; convenient carrying case; adjustable rip fence attachment; rubber covered electric cord with attachment plug; one high pressure grease gun filled with Skilsaw lubricant; socket wrench.

Model J—Junior

For ripping and cross cutting up to 2 inch dressed lumber. The light weight, compactness and power of this model make it extremely popular with the carpenter. It is becoming indispensable to manufacturing concerns, office buildings, hotels and shipping rooms of all industries, in fact wherever the hand saw was formerly used.

## Specifications

Cutting capacity—maximum  $1\frac{1}{2}$  inches deep.

Diameter saw blade, 6 inches.

Weight 11 pounds.

Model J—Voltage..	110	220
Each .....	\$60.00	63.00
Price for special voltages..	\$68.00	

Model E—Contractor

Every building operation requires Skilsaw Model E, the contractor's popular size for rip and cut-off work up to 3 inch dressed lumber. Economy is effected and handling costs reduced by "gauging" work. The tilting and vertically adjustable base makes "E" a versatile tool.

## Specifications

Cutting capacity—maximum  $2\frac{3}{4}$  inches deep.

Diameter saw blade, 8 inches.

Wide tilting base for bevel cutting.

Weight 18 pounds.

Model E—Voltage..	110	220
Each .....	\$135.00	138.00
Price for special voltages..	\$145.00

## SCROLL SAWS

## American Giant Scroll Saw Motor Unit

**Motor**—A. C., 110 volts, 60 cycles, speed 1725 R.P.M.,  $\frac{1}{2}$  H. P., with two shafts. This enables the use of any of the numerous available attachments, such as emery, buffing or wire wheel, drill chuck, sanding disc, also sanding table. The extra shaft may also be used for driving any other machinery.

Strong iron base, has all holes jig drilled so that any other Delta attachments such as lathe and circular saw may be added in the future. Equipped with 12 inch American Giant scroll saw; assembled ready for operation and packed in strong wood box.

- No. 70—With plain 12 inch frame; non-tilting table; six each Nos. 3 and 4 pin end blades; motor base with switch, cord and plug; No. 45 pulley; No. 50 "V" belt; shipping weight 70 pounds. Each. \$32.25  
 No. 75—Same as No. 70 except with tilting table; shipping weight 70 pounds ..... Each. \$34.25

Add \$5.00 if with D. C. motor, 115 volts.

## American Giant Scroll Saw

Large ( $5\frac{3}{4} \times 5\frac{3}{4}$  inches) two-piece, square steel table. Scientifically designed slide. Maximum strength at minimum weight. Large hardened crank block, has replaceable bronze bushing and gives this saw that smooth, easy action. Extra strong and long crank bearing. Safety drive wheel measures  $7\frac{1}{4}$  inches in diameter. Is counter balanced and grooved for "V" or  $\frac{1}{2}$  inch round belt. Rugged  $\frac{1}{2}$  inch diameter frame, holds blade firm and true. Will not jiggle sideways. Heavy hold-down arm is made from  $\frac{1}{2}$  inch diameter stock. Has forked end and is easily adjusted. Hardened saw blade guide supports blade securely. Prevents blade breakage, and allows severe feeding of work.

Strong base with bottom disc ground. Well ribbed and provided with heavy mounting bosses.

- No. 20—With plain 12 inch frame; non-tilting table; six each Nos. 3 and 4 pin end blades, 5 in. long; shipping weight 16 pounds. Each \$10.00  
 No. 25—Same as No. 20 except with tilting table; shipping weight 16 pounds ..... Each \$12.00

Prices Subject to Market Changes

## SCROLL SAWS

## American Scroll Saw Motor Unit

Mounted on strong iron base, finished in red enamel. A 1/20 H.P., 110 volt A.C. 60 cycle motor with special pulley and endless rubber belt drives the saw quietly, smoothly, and with power to spare. Belt will positively not slip, as it is of "V" section, same as used so successfully on ice machines, automobile fans, etc. Machine is ready to attach to lamp socket.

No. 63—With plain 8 inch frame, one fine and one coarse 5 inch pin end blades, motor, cord and plug and "V" belt; shipping weight 33 pounds ..... Each \$25.00

One in a wood box.

## American Scroll Saw

Frame of  $\frac{1}{8}$  inch diameter steel holds blade firmly and steady. Table measures  $4\frac{1}{2} \times 4\frac{1}{2}$  inches. Hardened steel support underneath table securely guides the blade. This feature prevents jiggling and bending of blade when feeding work severely, especially when cutting metal.

One-piece cold forged steel crankshaft runs in a long bearing. Slide designed for maximum strength and minimum weight. Crank block of bronze slides in its slot and gives machine smooth and easy action; it can be readily replaced at very little expense. Drive wheel  $5\frac{1}{2}$  inches diameter, grooved for  $\frac{1}{4}$  inch round or "V" belt. Holddown arm holds work firmly and is easily adjusted.

For cutting wood, bakelite, fiber, soft metals, celluloid, bone, etc. Will cut wood and similar material up to 1 inch in thickness, and soft metals up to  $\frac{1}{8}$  inch. Correct speed of drive wheel should be between 300-350 R.P.M. Can be operated by hand, but for convenient and accurate work, we suggest the use of a small electric motor. Any constant speed motor 1/20 H.P. up to  $\frac{1}{4}$  H.P. will drive saw very satisfactorily.

No. 10—With plain 8 inch frame for 5 inch pin end blades; with one fine and one coarse pin end blades and detachable wood handle; shipping weight 9 pounds..... Each \$6.00

One in a corrugated carton.

*Prices Subject to Market Changes*

Fine steel forging; warranted strong and permanent magnets.

No. 412—Polished head, 4 oz.; 12 inch handle.....Each \$0.95

Prices Subject to Market Changes

## NAIL HAMMERS

The Cheney Nailer

Adze Eye, Bell Face

Nail holding carpenter's hammer. Nail holding arrangement consists of two metal points backed by stout springs. Points meet and hold the nail securely in place behind them. The spring arrangement allows the nail to be easily inserted and as easily removed, and the niche is so cut that great driving force is directed to head of nail. The placing blow often drives the nail half way in.

Nail holding device allows for one-hand nailing. Securely holds any nail up to 20 penny. Nails quickly inserted, securely held and release themselves. A safety factor for nailing in precarious position. Gives longer reach in placing nails. Saves time and extra scuf-folding.

Full polished head; waxed, oval Never-Slip hickory handle.

No. 938—Size 11½; weight without handle 16 oz....Each \$1.50

Stanley

Adze Eye, Bell Face

A new and distinctive shape. Claws will reach across a 2x4 in. studding and are so bevelled that they will grip and pull a nail by the shank.

Drop forged special steel, carefully hardened and tempered. Chromium plated head. Selected hickory handle, multi-colored—painted in five colors, harmoniously blended together with a restful shade of green predominating. A beautiful tool, appropriate for gift purposes.

No. CP100 Plus—Weight 1¾ lbs.: length 13 inches....Each \$2.50

Plumb

Adze Eye, Bell Face

Special analysis steel, die forged; non-rusting black finish head; red stained hickory handle.

Nos.	Size	Weight	Each

# EXPANSIVE BITS

Russell Jennings

Solid  
Head

Screw  
Adjustment

Two Cutters

A passage way formed in the solid head takes the cutter which is adjusted by a worm in mesh with threads on cutter, which forms a rack. Pitch of adjusting screw is such that one complete turn changes diameter of hole  $\frac{1}{8}$  inch, one-half turn changes diameter of hole  $\frac{1}{16}$  inch, and so on. Creeping of cutter is prevented by clamping screw which holds worm and cutter firmly in position. Genuine crucible tool steel, full polished; tempered and sharpened cutter.

No. 71—With two cutters, cuts from  $\frac{7}{8}$  to  $2\frac{1}{2}$  inches; length over all  $10\frac{1}{2}$  inches; weight each 8 ozs. . . . . Each \$2.25

## BITS

### Forstner

The Forstner labor-saving auger bit, unlike other bits, is guided by its circular rim instead of its center, consequently it will bore any arc of a circle and can be guided in any direction regardless of grain or knots, leaving a true, polished surface. It is preferable and more expeditious than chisel, gouge, scroll saw or lathe tool combined, for core boxes, fine and delicate patterns, veneers, screen work, scalloping, fancy scroll twist columns, newels, ribbon moulding, mortising, etc.

## GRINDING WHEELS

### Aloxite

Made of highest grade materials and furnished in grades most commonly used. Especially adapted for electric drills and grinders.

Dia. in.	Face in.	Hole in.	Grain No.	Grade No.	Each
4	1/2	1/2	60	J	\$0.68
6	1/2	1/2	40	J	1.16
6	1/2	1/2	60	J	1.16
10	1	1	36	J	3.60
10	1	1	60	J	3.60
10	1 1/2	1 1/4	24	H	4.90
10	1 1/2	1 1/4	40	J	4.90

## WIRE WHEEL BRUSHES

### For Cleaning and Polishing

Rigid and compactly made having more wires per square inch of brush surface than the average wheel. Wires being tightly compressed give greater wearing strength to brush. Have interchangeable bushings which slip into the 2 inch standard size opening and adjust to fit any size spindle.

Arbor bushings can be furnished with 1/2, 3/8, 1/2, 5/8 or 1 inch arbor hole.

**Note**—Be sure to specify diameter of arbor hole bushings.

Nos.	153	152	151
Diameter, inches	8	10	12
Width, inches	1 1/2	1 3/4	2
Each	\$3.00	4.80	6.00

## BUFFING WHEELS

Meets the need for a light, portable buffer for polishing a number of different objects that have formerly necessitated hand work.

**Buffing Wheel**—18 ply section; diameter 6 inches; 3/8 inch arbor hole.....Each \$0.15

## HIGH SPEED HOLE SAWS

For Use with Millers Falls Electric Drills  
Nos. 312, 612, 658, 634, 734

Designed especially for fast cutting at electric drill speeds. Blades of 18% Tungsten high speed steel.

Simple construction, saw replaced readily. Shanks for sizes 1 1/4 inches and up made with three flat surfaces which prevent slipping in drill chuck.

### Cup and Saw

Saw Size.			Saw Size.		
No.	in.	Each	No.	in.	Each
12	3/4	\$1.45	36	2 1/4	\$2.20
14	7/8	1.45	40	2 1/2	2.20

**BREAST DRILLS**

Millers Falls

**Two Speeds**

This drill has been a standard for many years. It is built along simple lines yet has every feature essential to good drilling. It is a "full service" drill at a moderate price.

**Specifications**

Chuck—three jaw. Improved protected springs.

Gear ratio even and 3 to 1. Changed by pressing spring and shifting large gear.

Annular ball bearing spindle, as well as ball thrust bearing, with take up nut to provide for wear.

Frame has hand hold for steadying tool.

Handles—stained hardwood. Crank handle extensible. 4 to 6 in. radius.

Cut gears. Pinion of steel. Idler roll to equalize bearing. Adjustable breast plate.

Frame malleable iron enameled black. Level attached. Large gear enameled red. Other metal parts nicked.

**No. 118**—Capacity 0- $\frac{1}{2}$  inch round shanks; length 17 $\frac{1}{2}$  inches; weight each 6 $\frac{1}{2}$  pounds.....Each \$5.70

This breast drill has been designed for those who want a sturdy tool that will give a lot of service at a reasonable price. It has a solid steel frame, nickel plated with stained hardwood crank and side handle. The breast plate is black and the large gear red. This drill has a three-jaw chuck with protected springs. Single speed cut gears and steel pinion.

**No. 3000**—Capacity 0- $\frac{3}{8}$  inch round shanks.....Each \$1.50

*Prices Subject to Market Changes*

## HAND DRILLS

### Yankee Ratchet

Can be adjusted by a shifter on cylinder; with slide in first notch the tool is a plain drill; in second, a left hand ratchet; in third, a right hand ratchet; in fourth, a double ratchet; in fifth, drill is locked to adjust chuck.

Single speed, with right and left hand and continuous ratchet movement. Dead black finish. Malleable iron frame, steel spindle, cut gears,  $4 \times 1\frac{1}{2}$  inch detachable hollow hardwood handle.

No. 1530— $10\frac{1}{2}$  inches long, three-jawed chuck holding up to  $\frac{3}{8}$  inch round shanks only, without drill points, weight each  $1\frac{1}{4}$  pounds.. Each \$4.50

### Yankee Plain

No. 1430—Same as No. 1530, except without ratchet movement.....Each \$3.20

### Millers Falls, Complete with Drill Points

Enameled iron frame, red large gear, nickel plated parts, cut gears with adjustable equalizing bearing, ball thrust bearing, hollow cocobolo handle with screw cap containing eight ( $\frac{1}{8}$  to  $\frac{1}{4}$  inch) drill points. Detachable side handle.

No. 1— $12\frac{1}{2}$  inches long, three-jawed chuck holding 0 to  $\frac{3}{8}$  inch round shanks, weight each  $1\frac{1}{4}$  pounds.....Each \$3.00

### Millers Falls, without Drill Points

This hand drill is made in the usual Millers Falls style and designed to give long satisfactory service over a period of years. It has a solid steel frame and three-jaw chuck. Single speed cut gears and steel pinion. The main handle is solid stained hardwood. The frame and chuck are nickel plated and the large gear is painted red.

No. 2500—Capacity 0 to  $\frac{1}{4}$  inch round shanks making it useful for all round work .....Each \$0.85

**Prices Subject to Market Changes**

**Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect**

## AUTOMATIC DRILLS

Yankee

No. 41—11 $\frac{3}{8}$  inches long with drill point, steel and brass construction, nickel plated, magazine in handle for holding drill points, complete with 8 drill points,  $\frac{1}{8}$  to  $\frac{1}{4}$  inch, weight each 11 ounces..Each \$2.30

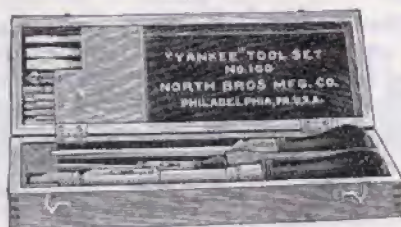

Millers Falls

No. 841—This popular priced automatic drill is constructed of steel heavily nickel plated with an orange handle and fits the hand comfortably; a magazine in the handle contains eight drill points; chuck is the improved type and holds drill points firmly; length over all 10 $\frac{1}{4}$  inches; weight 9 oz.....Each \$1.20

## RATCHET SCREW DRIVER TOOL SET

Yankee

Put up in substantial and well finished boxes for use by mechanics who desire to keep tools in fine order, and by amateur mechanics who especially appreciate tools put up in handsome sets. The box, which is made of oak, handsomely finished, contains one each of the following "Yankee" tools:

No. 30A Spiral Ratchet screw driver.

Chuck, with drill points, eight sizes,  $\frac{1}{16}$ ,  $\frac{1}{8}$ ,  $\frac{3}{16}$ ,  $\frac{1}{4}$ ,  $\frac{5}{16}$ ,  $\frac{3}{8}$ ,  $\frac{7}{8}$ ,  $\frac{1}{2}$  inch, to use for drilling holes with the No. 30A Spiral Ratchet screw driver. Countersink to use in same tool.

No. 11 Ratchet screw driver, with blade 6 inches long.

No. 15 Ratchet screw driver, with finger turn on blade, with blade 3 inches long.

Set covers all the usual requirements in tools for driving and drawing out screws. The tools are easily removed from box, and when it is closed are held firmly in place.

Per Set

No. 100—Size of box 12 $\frac{1}{2}$ x4 $\frac{3}{4}$ x2 $\frac{3}{4}$  inches; weight 3 $\frac{1}{4}$  pounds....\$7.70

*Prices Subject to Market Changes*

**SCREW DRIVERS****Yankee Improved Spiral Ratchet**

Nickel plated parts, polished hardwood handle, with 3 sizes of bits.

**Regular Pattern, Right  
or Left Hand  
and Rigid**

**YANKEE CHUCKS WITH DRILL POINTS**

For Use with Yankee Spiral Ratchet Screw Drivers

"YANKEE" Drill Points

Chuck showing drill point in position to be inserted into chuck of driver.

**Drill Sets with Chuck**

No. 30C—8 drill points, $\frac{1}{16}$ to $\frac{1}{4}$ inch, for Nos. 30A and 130A screw drivers .....	Set \$0.95
No. 31C—8 drill points, $\frac{1}{8}$ to $\frac{1}{2}$ inch, for Nos. 31A and 131A screw drivers .....	Set \$0.95
Chucks only .....	Each .15

**YANKEE SCREW HOLDER AND BIT**

A longer bit than regular, with holder attached to hold screw. When screw is driven in place the jaws open as the head of screw sinks into wood.

No. 30—For Nos. 30A and 130A Screw Drivers..... Each \$0.55

*Prices Subject to Market Changes*

*Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect*

## SCREW DRIVERS

## Yankee Ratchet

## Right and Left Hand and Rigid

Forged cast steel bits, tempered, ground and polished. Other metal parts nickel plated and buffed. Polished hardwood handles. Construction of ratchet and pawls is such that neither can bend, break, wear nor get out of order.

Adjustment for right or left hand is made by slide moved in direction of length of blade.

No. 10—Length blade, inches...	2	3	4	5	6
Each .....	\$0.58	.72	.77	.85	.95

## Genuine Champion

Every blade tested to split a screw head. The blade is forged from the toughest steel, tempered with great care, and shrunk into a solid malleable bolster which rests in heavy ferrule, while tang (which forms a part of the bolster) enters and passes nearly through the handle.

## Regular Blade

Polished steel blades; cherry stained fluted hardwood handles; polished steel ferrules.

Cutter, inches....	1½	1¾
Each .....	\$2.00	2.15

## Knuckle Joint Lever

Fitted with a new and patented form of lever or cap called "knuckle joint," which, being entirely of steel, is practically indestructible.

## Nickel Plated Trimmings

Nos. ....	18	19
Length, inches....	6	7
Cutters, inches....	1½	1¾
Each .....	\$2.35	2.50

## Stanley Adjustable

For those desiring a plane for ordinary work that does not require that the tool be frequently adjusted, we strongly recommend this line.

## Lever Adjustment

No. 103 is for light work. The cutter is adjustable endwise. The bottom is ground true and the sides neatly japanned.

No. 103—Length 5½ inches; 1¾ inch cutter.....Each \$0.90

## Lever Adjustment

No. 120 is similar in design to the No. 103, having the same form of cutter adjustment and cutter fastening device. However, in this plane the sides are ground. Rosewood knob.

No. 120—Length 7 inches; 1¾ inch cutter.....Each \$1.30

## Screw Adjustment

No. 220 is in many ways better adapted for average use than any of the cheaper block planes made. It is ground on both bottom and sides. The cutter is fastened by a lever and cam, and is adjustable endwise. Rosewood knob.

No. 220—Length 7 inches; 1¾ inch cutter.....Each \$1.35

Prices Subject to Market Changes

## IRON BLOCK PLANES

### Stanley Non-Adjustable

For those desiring a plane for ordinary work that does not require that the tool be frequently adjusted, we strongly recommend this line.

No. 100

No. 101

### Japanned

Handy little planes for household use and many mechanics carry one in their kits for odds and ends of light work. No. 100 has an iron handle.

Nos. ....	100	101
Length, inches.....	3½	3½
Cutter, inches.....	1	1
Each .....	\$0.45	.35

### Japanned

A light, serviceable plane, 5½ inches long. The bottom is ground and the sides japanned.

No. 102—Length 5½ inches; 1¾ inch cutter.....Each \$0.70

### Japanned Trimmings

The most popular of all the non-adjustable block planes. Both the bottoms and sides are ground and in place of the boss on the front for a finger rest, it has a rosewood knob.

No. 110—Length 7 inches; 1½ inch cutter.....Each \$0.90

*Prices Subject to Market Changes*

### Stanley Adjustable

### Japanned Trimmings

Designed especially for manual training use. It is fitted with the "Hand-y" feature. The cutter is secured in its place by a lever fastened with a cam. Cutter adjustable endwise. Rosewood knob.

No. 203—Length 5½ inches; 1¾ inch cutter.....Each \$1.20

### Stanley Double End Non-Adjustable

### Japanned Trimmings

Has two slots and two cutter seats. The center seat and slot to be used for ordinary block plane work, the other slot and seat for use when it is desired to work same as a bull nose plane. Hardwood knob.

No. 130—Length 8 inches; 1½ inch cutter.....Each \$1.35

### Stanley Non-Adjustable Bull Nose

### Japanned

No. 101½—Rosewood knob; length 3½ inches; width of cutter 1 inch; weight ¾ pound.  
Each .....\$0.35

**BLOCK AND RABBIT PLANES**

Stanley Adjustable

**Japanned Trimmings**

The detachable side will easily change this tool from a Block Plane to a Rabbit Plane, or vice versa. The cutter is set on a skew and is adjustable endwise. Rosewood knob.

No. 140—Length 7 inches;  $1\frac{1}{4}$  inch cutter; weight  $1\frac{1}{2}$  pounds.

Each .....\$2.30

**CABINET MAKERS EDGE PLANES**

Stanley Adjustable

**Japanned Trimmings**

For piano makers and all cabinet workers. Has cutter resting on solid bed practically its entire length. Cutting edge being located at extreme end of plane, gives the tool the form of a chisel. No other plane can be worked in such a small space or so close up into corners. Cutter adjustable endwise. Rosewood knob.

No. 97—Length 10 inches;  $2\frac{1}{4}$  inch cutter; weight  $3\frac{3}{4}$  pounds.

Each .....\$3.60

**BULL NOSE RABBIT PLANES**

Stanley

**Japanned**

Very useful for working close up into corners or other difficult places. The mouth can be adjusted to different widths by means of the set screw on top of the plane.

No. 75—Length 4 inches; 1 inch cutter; weight  $\frac{5}{8}$  lb. Each \$0.60

**EDGE TRIMMING PLANES**

Stanley

**Japanned**

For trimming or smoothing edge of boards for square or close fit. Cutter works on a skew. Wood blocks of various bevels may be attached enabling user to make slanting cut.

No. 95—Length 6 inches;  $\frac{7}{8}$  inch cutter; weight each  $1\frac{1}{4}$  pounds.

Each .....\$1.55

**SCRUB PLANES**

Stanley

**Japanned**

For planing down to a rough dimension any board that is too wide to conveniently rip with a hand saw, an operation that is sometimes called "hogging." This is made possible by reason of the shape of the extra heavy cutter, the cutting edge of which is round instead of square. Handle and knob of beech.

Nos. .... 40 40½

Length, inches.... 9½ 10½

Cutter, inches.... 1½ 1½

Weight, lbs..... 2½ 2½

Each .....\$1.95 2.60

**CIRCULAR PLANES**

Stanley

**Japanned**

Flexible steel face, adjustable for planing inside or outside of circle. Cutter adjustable endwise and sidewise. Face fastened at each end to body, and adjusted by screw at center.

Design of frame provides convenient and firm handles for both hands.

No. 20—Length 10 inches;  $1\frac{1}{4}$  inch cutter .....Each \$7.50

Prices Subject to Market Changes

## SIDE RABBIT PLANES

Stanley

No. 98

No. 99

### Nickel Plated

Made in two styles, No. 98 for right hand work and No. 99 for left hand work.

These will be found to be very convenient for side-rabbiting in trimming dados, mouldings and grooves of all sorts. A reversible nose-piece gives the tool a form whereby it will work close up into corners when required. Fitter with depth gauge. Rosewood knobs.

### Right Hand

No. 98—Length 4 inches;  $\frac{1}{2}$  inch cutter; weight  $\frac{1}{2}$  pound.

Each .....\$1.75

### Left Hand

No. 99—Length 4 inches;  $\frac{1}{2}$  inch cutter; weight  $\frac{1}{2}$  pound.

Each .....\$1.75

## RABBIT PLANES

Stanley Handled

### Japanned Iron Stock

Will lie flat on either side and can be used with right or left hand while planing into corners or up against perpendicular surfaces. Fitted with a spur for working across the grain and detachable depth gauge.

Nos. ....	190	192
Length, inches.....	8	8
Cutters, inches.....	1½	1
Weight each, pounds.	2½	2
Each .....	\$2.30	2.10

## SIDE RABBIT PLANES

Stanley

### Nickel Plated

Convenient for side rabbiting, in trimming dados, mouldings and grooves of all sorts. Reversible nose piece allows it to be worked up into close corners when required.

No. 79—Length 5½ inches;  $\frac{1}{2}$  inch cutters; weight 1 pound.

Each .....\$2.00

## CABINET MAKERS RABBIT PLANES

Stanley

No. 90

No. 92, 93, 94

### Nickel Plated

For fine cabinet or other work where extreme accuracy is required. Both sides are square with bottom; sides and bottoms are machine ground. Will lie perfectly flat on either side and can be worked either right or left hand. Width of throat opening or mouth adjustable so that it can be widened or narrowed as coarse or fine work may require. Cutters adjustable endwise. By removing the front a chisel plane is obtained. "Hand-y" feature.

No. 90—Length 4 inches; 1 inch cutter; bull nose pattern, can be used close up into corners or other difficult places; weight 1 pound.....Each \$3.25

## DUPLEX RABBIT AND FILLETSTER PLANES

Stanley

### Japanned, Nickel Trimmings

Has two seats for the cutter, one for regular, the other for bull-nose work. Also a spur and a removable depth gauge. The adjustable fence can be used on either side of the plane and slides under the bottom for regulating the width of the cut. The rear cutter is adjustable endwise. To work as a rabbit plane, remove fence and arms.

No. 78—Length  $8\frac{1}{2}$  inches;  $1\frac{1}{2}$  inch cutter; weight 3 pounds..  
Each .....\$2.65

## IRON DADO PLANES

Stanley

### Japanned, Nickel Trimmings

Will keep true even in the narrowest widths. They have skew cutters, an adjustable depth gauge, and two adjustable spurs.

No. 39—Length 8 inches

Cutter, Inches	Weight, Lbs.	Each
$\frac{1}{4}$	$1\frac{1}{4}$	\$2.40
$\frac{1}{2}$	$1\frac{1}{2}$	2.70
$\frac{3}{4}$	2	3.00
$\frac{7}{8}$	2 $\frac{3}{4}$	3.10
1	2 $\frac{1}{2}$	3.25

## WEATHER STRIP PLOW PLANES

Stanley

### Japanned, Nickel Trimmings

Especially designed for weather stripping work. Also adapted for all plow work within its limits. Fitted with depth gauge and adjustable fence. Complete with 7 cutters— $\frac{1}{8}$ ,  $\frac{3}{16}$ ,  $\frac{1}{4}$ ,  $\frac{5}{16}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ , and  $\frac{5}{8}$  inch wide.

No. 238—Length  $7\frac{1}{2}$  inches; weight  $1\frac{1}{2}$  pounds..Each \$4.85

## SPECIAL DADO PLANES

Stanley

### Japanned, Nickel Trimmings

For blind wire grooving as well as for many other purposes. Fitted with double spur, prevents splintering; depth gauge allows groove to be cut up to limit of plane— $\frac{1}{2}$  inch. Adjustable fence.

No. 239—Length  $7\frac{1}{2}$  inches

Cutter, inches.....	$\frac{1}{8}$	$\frac{3}{16}$
Weight, lbs.....	$1\frac{1}{2}$	1 $\frac{3}{4}$
Each .....	\$3.50	3.80

## COMBINATION PLANES

### Stanley "Fifty-Five" Plane

*"A Planing Mill Within Itself"*

In addition to being a bending and center beading plane, a plow, dado, rabbet, filletster, and match plane, a sash plane and a slitting plane, is also a superior moulding plane, and will accommodate cutters of almost any shape and size.

Main fence has lateral adjustment for extra fine work. Fences can be used on either side of plane, and the rosewood guides can be tilted to any desired angle up to forty-five degrees. Second fence can be reversed for center beading wide boards.

Fitted with spurs for working across the grain, and a special cam rest to steady the plane when working in certain positions.

Metal parts nickel plated; handle and fences of rosewood, every part well finished.

No. 55—With 55 cutters; packed in a neat substantial box; weight 15 pounds... Each \$23.40

### Stanley "Forty-Five" Plane

*"Seven Tools in One"*

This well known and useful tool in reality combines seven planes in one in a compact and practical form—bending and center beading plane, plow, dado, rabbet and filletster, match plane, sash plane, slitting plane.

Fence has lateral adjustment for extra fine work and can be attached to either side of plane.

Fitted with spurs for working across the grain, and a special cam rest to steady the plane when working in certain positions.

Following cutters included—11 plow and dado, 7 beading, 1 filletster, 1 sash, 2 match and 1 slitting; also two sets of arms, one set 4½ inches long, one set 8½ inches long. Metal parts nickel plated; handle, knob and fence of rosewood.

No. 45—With 23 cutters; packed in a neat, substantial box; weight 9½ pounds... Each \$11.90

*Prices Subject to Market Changes*

*Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect*

Stanley

## Skew Cutter Combination

Can be used as a plow, dado, filletster, matching and rabbet plane. Fitted with spurs, depth gauge and fence. The fence has a rosewood face. Nickel plated frame; rosewood handle and knob.

## 12 Cutters as Follows:

Plow and Dado,  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{7}{8}$ ,  $1\frac{1}{4}$  inch.

Filletster,  $1\frac{1}{2}$  inches.

Tonguing,  $\frac{1}{4}$  inch and one slitting cutter.

No. 46—Length  $10\frac{1}{2}$  inches; weight  $5\frac{3}{4}$  lbs.....Each \$8.95

## Light Combination

A small combination plane for light work. Can be used as a plow, beading, matching or rabbet plane. Fitted with spurs, depth gauge, shaving deflector and fence. Fence has 5 inch adjustment. Nickel plated frame.

## 15 Cutters as Follows:

Plow and Dado,  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{7}{8}$  inch.

Beading,  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{7}{8}$  inch.

Tonguing— $\frac{1}{4}$  inch.

No. 50—Length  $9\frac{1}{4}$  inches; weight  $3\frac{3}{4}$  pounds.....Each \$7.00

## HAND BEADERS

Stanley

## Nickel Plated

For beading, reeding or fluting straight or irregular surfaces—also adapted for light routing. It is fitted with two gauges; one for straight, the other for curved work.

The sample illustrated shows some of the work that can be done.

With each tool are furnished 8 cutters, sharpened at both ends and embracing the following assortment:

6 Single Beads— $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{7}{8}$  inch.

2 Fluting Tools— $\frac{1}{8}$ ,  $\frac{1}{4}$  inch.

4 Reeding Tools—(2 beads  $\frac{1}{4}$  inch, 2 beads  $\frac{3}{8}$  inch, 3 beads  $\frac{1}{2}$  inch, 4 beads  $\frac{5}{8}$  inch).

2 Routers— $\frac{1}{8}$  and  $\frac{1}{4}$  inch.

1  $\frac{5}{8}$  inch Blank, which can be filed as desired.

No. 66—Length  $11\frac{1}{2}$  inches; weight  $1\frac{3}{4}$  pounds.....Each \$1.60

Prices Subject to Market Changes

# ROUTER PLANES

Stanley

For surfacing the bottom of grooves or other depressions parallel with the general surface of the work. The bottoms are designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on large openings.

Three cutters are furnished:  $\frac{1}{4}$  and  $\frac{1}{2}$  inch router cutters and a patented (3 piece) "V" or smoothing cutter. Nickel plated iron frame, maple knobs.

No. 71

No. 71  $\frac{1}{2}$

## Open Throat

Cutters are adjustable and can be held on the front of the cutter post for regular work, or on the back for bull-nose work. An attachment for closing the throat, for use on narrow surfaces and regulating depth of cut, is furnished.

No. 71—Length  $7\frac{1}{2}$  inches; weight  $2\frac{5}{8}$  pounds..Each \$3.30

## Closed Throat

Cutters are adjustable and can be held on the front of the cutter post for regular work or on the back for bull-nose work.

No. 71  $\frac{1}{2}$ —Length  $7\frac{1}{2}$  inches; weight  $2\frac{1}{2}$  pounds..Each \$2.55

# ROUTER PLANES

Stanley

## Small Size

Useful on very narrow work for pattern and cabinetmakers, also carpenters in letting in lock plates, etc. So constructed that either a closed throat for regular work or open throat for bull nose work, can be had. By reversing cutter it can be used as a depth gauge.

No. 271—Length 3 inches;  $\frac{1}{4}$  inch cutter; nickel plated; case hardened thumb screw; weight  $\frac{3}{4}$  pound .....Each \$0.60

# TONGUE AND GROOVE MATCH PLANES

Stanley

## Swinging Fence

Furnished with two plow cutters of same width and one extra wide cutter. Fence can be set to expose either two cutters for cutting tongues, or reversed to leave only one exposed for cutting grooves. Extra wide cutter used for cutting tongues when boards are too thick for the smaller cutters.

## PLANE IRONS

## Stanley

The single irons of the same size are identical; thus a 2½ inch single iron fits all planes that take a 2½ inch plane iron. The cap iron (which combined with single iron makes the double iron), however, is not the same in all cases on the iron, wood and circular planes and is therefore not interchangeable.

In ordering be sure to give the number of the plane, size of iron and state whether single iron or iron and cap complete are required.

For "Bed Rock" and "Bailey" Iron,  
Circular and Wood Planes

Size, inches	Plane Irons Single, Each	Plane Iron Caps, Each
1½	\$0.45	\$0.32

2	.55	.32
2¼	.65	.35
2½	.70	.40
2¾	.75	.45

For Stanley and "Bailey" Block  
Planes

Adjustable—Size 1½ inches; for planes Nos. 9½, 15, 16, 17, 18, 19, 63, 65, 65½, 120, 131 and 220.  
Each .....\$0.38

## SCRAPER PLANES

## Stanley

## Single Handle

Handle and knob have same form as regular "Bailey" plane, being preferred by some users to the two-handle or double grip form of scraper plane.

Blade adjustable endwise and for angle, and can be firmly locked in position desired.

Japanned stock; rosewood handle and knob.

No. 112—Length 9 inches; 2½ inch cutter; weight 4 pounds.

Each .....\$3.35

Extra Blades .....Each .40

## CABINET SCRAPERS

## Stanley

## Double Handle, Iron Bottom

The blade may be sprung to a slight curve by means of a thumb screw, giving ease of operation and quickness of cut. The handles are raised to protect the user's hands, and pierced so that the tool can be hung up out of the way. Body and handles are cast in one piece. Japanned.

No. 80—Length 11½ inches; 2¾ inch cutter; weight 1¾ pounds.  
Each .....\$1.15

Extra Blades—For No. 80 scraper.  
Each .....\$0.25

Prices Subject to Market Changes

## CABINET SCRAPERS

Stanley

### Single Handle, Adjustable

Handle can be tilted to give blade any angle desired. Special blades of different forms and widths can be securely held in any position required, thus permitting the tool to be worked in many places inaccessible to other scrapers. Handle and knob of hardwood.

No. 82—Japanned; length 14½ in.; 3 in. blade; weight 1¾ pounds - Each .....\$1.55  
Extra Blades .....Each .25

Dikeman

### Single Handle, Adjustable

Universal ball joint of handle permits any required angle in its relation to blade; locks and loosens by a ¼ turn of handle; reversible head, allows use of either edge of blade without removing blade from holder.

Holder takes any blade 3 inch wide or less and from No. 16 to No. 20 gauge. Blade held between heavy steel plates.

No. 125—Polished steel; stained hardwood handle; length 10½ inches; weight 29 oz. Each \$2.00

- No. 600R** —Polished; highly polished steel..... Each \$5.60
- No. 600BR**—Blued; white enameled figures and marks..... 6.20
- In enameled waterproof case.

Prices Subject to Market Changes

## CARPENTERS COMBINATION SQUARES

Starrett

With Level, Mitre and Plumb

This square will readily appeal to the carpenter and others not requiring a fine graduation of the blade or a scriber. The head may be clamped to any point of the blade. The blade is graduated 8ths and 16ths on both sides, and the lines and figures are very distinct. It is also convenient to square a piece with a surface and at the same time tell whether one or the other is level or plumb. The blade can be used separately as a rule. Combines a marking gauge, rule, square, mitre, depth gauge, height gauge, level and plumb.

No. 94—Length 12 inches.....Each \$1.30

## TRY SQUARES

Disston

No. 5 1/4—Iron Stock

Steel blade, square inside and out; nickel plated.

Size—In..	4	6	8	10	12
Each.....	\$0.46	.60	.67	.87	1.03

Prices Subject to Market Changes

Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect

## SLIDING T BEVELS

Disston

No. 3—Iron Stock

Nickel plated iron stock, steel blade. The blade is easily secured by turning the thumb screw at the lower end of handle.

Size, inches....	6	8	10
Each .....	\$0.72	.90	1.00

No. 2—Rosewood Stock

Rosewood stock, heavy brass plates; tempered and blued steel blade.

Size, inches....	6	8	10
Each .....	\$0.48	.54	.56

## WOOD MARKING GAUGES

Stanley

Boxwood, polished; square head; single oval form bar; graduated in 16ths inches for 6 inches from point; brass screw; bar protected by brass shoe; adjustable point; brass face plate inserted in the head to prevent wear.

Concave Work      Convex Work

## With Circular Face Plate

This gauge has a device consisting of a brass face with two ribs attached to one side of the head which enables the operator to run a gauge line with perfect steadiness and accuracy around curves of any degree, either concave or convex.

No. 165.....Each \$0.80

## Without Circular Face Plate

No. 65.....Each \$0.80

## MORTISE AND MARKING GAUGES

Stanley

Slide Gauge

Has a slide working in the bar. One point is affixed to the slide, the other to the bar itself. Both sides of the mortise are marked at the same time. Oval form bar, graduated in 16ths inches for 3 inches from point.

No. 77—Rosewood; brass adjustable slide; brass screw, face plate and stop screw. Each \$1.40

Double Bar Gauge

Has two independent bars working in the same head. One pin affixed to each bar. One side of the mortise is marked and the gauge turned over for marking the other side. Oval form bar, graduated 16ths inches for 6 inches from point.

No. 71—Beech, polished; brass screw; head plated; brass stop screw .....Each \$0.95

Prices Subject to Market Changes

# BUTT GAUGES

Stanley

## Rabbeted Jamb or Nailed Strikes

For rabbeted jamb cutter "A" marks from the jamb in the rabbet—cutter "B" from the edge of the door engaged in closing—cutter "C" the thickness of the butt.

For nailed on strikes cutter "B" when reversed marks for the butt on both door and jamb—cutter "C" the thickness of the butt.

It can also be used as a marking and mortise gauge and as an inside or outside square for squaring the edge of the butt on either door or jamb.

No. 94—Nickel plated; graduated in 16ths of inches for 2 inches.  
Each .....\$1.50

## For Rabbeted Jamb

Cutter "A" marks from the jamb in the rabbet—cutter "B" from the edge of the door engaged in closing—cutter "C" the thickness of the butt. It can also be used as a marking and mortise gauge and as an inside or outside square for squaring the edge of the butt on either door or jamb.

No. 95—Nickel plated; graduated in 16ths of inches for 2 inches.  
Each .....\$1.40

# SCRATCH GAUGES

Starrett

## Graduated 64ths of Inch

For scribing lines parallel to a given surface. Made of steel with hardened cast steel head. Split bushing in head grips beam securely when set screw is tightened. Marker is a square piece of thin steel firmly held against edge of beam presenting four marking points. Fine adjustments may be made by a slight rotating movement of head on beam. Two extra cutters with each gauge.

No. 29—Lgth. beam, in. 5 6  
Diameter beam, in. . . . . 1/16 7/16  
Each .....\$1.00 1.30

## FARRAND RAPID RULES

### Graduated Inches and 16ths

A continuous strip of high carbon steel, coiled within a holder about the size of a man's watch. When released from holder, rule blade is rigid and can be used to measure vertical or horizontal surfaces. With slight pressure rule becomes flexible and will measure curved surfaces. Two brake handles regulate length at any desired point or blade may be removed entirely from holder. Blade nickel plated.

No. A100—Length 8 feet; nickel plated holder.....Each \$5.00

No. B200—Length 6 feet; brass finish holder.....Each \$3.75

Prices Subject to Market Changes

Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect

**"GNOME BRAND" TOOL OUTFITS AND WORK BENCHES**

All cabinets are substantially built of oak, (unless otherwise stated), varnished and finely finished, and the hardware fittings are of brass.

The benches and combination benches are constructed of well-seasoned hard maple. The doors and drawers are well made and carefully fitted. They are shown as well as pictures permit, but you must really see to appreciate the appearance and enduring construction of our benches and cabinets. When closed, the cabinets are in keeping with any piece of finely finished furniture.

**COMBINATION BENCH AND TOOL CABINET**  
**"Gnome Brand"**

No. 100

This combination bench cabinet is unique in construction. The illustration shows fully its many desirable features, among which are its conveniently arranged drawer and closet space, side opening and hinged top. Bench top of seasoned maple, absolutely rigid and supported by strong uprights which rest directly on the floor. When cabinet is closed, bench top as well as all tools are inside, thus making it a fine piece of polished furniture. Trimmed throughout with solid brass locks and handles.

Cabinet Dimensions—Length 47 inches, width 19 inches, height 35 inches. Wood vise with  $1\frac{1}{4}$  inch screw and double bench stop; bench top is arranged for their adjustment. Outfits contain highest grade tools as per detailed list on opposite page.

Approximate shipping weight of cabinets complete with tools 375 pounds

## MANUAL TRAINING OUTFITS

H. S. &amp; Co.

We wish to impress upon all who are interested in manual training work, that the tools in these various outfits are all of the highest grade. Our hobby since 1848 has been to handle only the best, and our extended experience has proven time and again that only the best tools obtainable should be used for manual training. In the hands of beginners, tools are usually put to severe and undue strain and unless quality is there they are bound to give way. Every tool is warranted to be perfect.

## TOOL OUTFIT AND CABINET

"Gnome Brand"

No. 18

The cabinet for this outfit is made of solid oak, with locked corners; is trimmed in brass, well finished, and high grade in every detail. The outside dimensions are 33 inches in height, 22 inches wide, and 10 inches deep, and the door is divided to open in the center. When open, the width across entire front is 44½ inches. There is room in the drawer for the utility box No. 2, a small tray divided into compartments for holding an assortment of nails, tacks, hooks and screws, and this box, filled, is included with each outfit. The illustration shows 52 different tools and their compact arrangement.

The tools in this outfit are the best obtainable.

## WORK BENCHES

H. S. &amp; Co.

We call attention to the superior quality of our Benches. They are not the ordinary kind made to sell in competition with the cheapest, but are made of seasoned stock, carefully and scientifically put together. The lumber is cut and prepared before use, giving sufficient time to dry and cure, and will not warp or crack after a short period, as the inferior and cheaper-priced benches so often do. We take pleasure in recommending them to the most particular.

(Cut shows Style B)

## Style B

Substantially built of hard white northern maple, thoroughly seasoned. Glued and well finished, working top 16 inches wide; tool recess 8 inches wide; top over all 78x24 inches; height 34 inches; legs 2x3 inches. Two wood bench vises; no drawer.

**Style B**—With two medium stops and wooden bench screws; shipping weight 180 pounds.  
Each .....\$36.00

**No. BB**—Same as Style B, except has 2 iron instead of wooden bench screws.....Each \$36.00

## Style E

Imported, hand made of Austrian red beech, waxed finish. Uprights made of 4 inch square timbers. Top, exclusive of vise, 78x24 inches, 2½ inches thick, 6 inch recess, 33 inches high, two iron stops. Head vise 22 inches wide, opens 10 inches, provided with device for equalizing strain when work is clamped at one end.

Tail vise 6¼ inches wide, opens 9½ inches, with locked corners. Drawer 15 inches wide, 15½ inches deep, 4½ inches high.

**Style E**—Weight 230 pounds.....Each \$55.00

## Style M

Similar to style B but smaller. Made of maple. Top exclusive of vises is 51 inches long; 20 inches wide, 2½ inches thick, 6 inch recess; height 33 inches. Has two wood stops. Head vise 14 inches wide, opens 12 inches. Tail vise 6 inches wide, opens 6½ inches.

**Style M**—Weight 115 pounds.....Each \$33.00

*Prices Subject to Market Changes*

# WORK BENCHES "Gnome Brand"

Style J

Made of maple, except vise screws, which are second growth hickory. Top, 48 inches long, 18 inches wide, 2 inches thick, with 6 inches recess; 32 inches high. Has two wooden stops. Head vise 12 inches wide, opens 8½ inches. Tail vise 12 inches wide, opens 10 inches.

Style J—Weight 105 pounds.....Each \$24.50

Style L

Made of maple, except vise screws, which are hickory. 42 inches long, 20 inches wide, 2 inches thick, with 6 inches recess; 32 inches high. Has two wooden stops. Head vise 12 inches wide, opens 10 inches. Tail vise 12 inches wide, opens 8 inches.

Style L—Weight 90 pounds.....Each \$19.00

*Prices Subject to Market Changes*

*Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect*

## WORK BENCHES

No. 102

Designed primarily for the home work shop. Made of well seasoned maple throughout, fitted with Rapid-Acting Vise and Steel Bench Dog. Top 42 inches long, 22 inches wide,  $1\frac{3}{4}$  inches thick, with 7 inch recess. Drawer  $5\frac{1}{2}$  inches high, 22 inches wide, and 19 inches deep.

No. 102—Weight 110 pounds.....Each \$28.00

No. 104

An excellent bench for home use. Made of maple. Top 52 inches long, 22 inches wide,  $2\frac{1}{4}$  inches thick, with 7 inch recess. Drawers measure 5 inches high, 17 inches deep, 32 and  $15\frac{1}{2}$  inches long. Stands 32 inches high. Fitted with No. 3 Rapid Acting Vise, Steel Dog and Malleable Bench Stop.

Opens, inches .....	12
Weight each, lbs.....	42
Each .....	\$7.55

### Sheldon Rapid Acting Vise

Constructed on the principle of a machinists' vise, outer jaw and slide being in one piece. When vise jaw is brought in contact with work, the first part of movement of handle raises milled rack into engagement with a 14-tooth steel section. The following part of movement draws front jaw against work by means of cam in front of handle. The movement of slide is absolutely free when handle is in vertical position. Holes through jaws permit wooden faces to be easily attached.

With Stop

Jaws 3x7 inches.

No. 3—Opens 8½ inches; weight 27 pounds.....  
.....Each \$8.35

Without Stop

Jaws 3x7 inches.

## CARPENTER TOOL BOXES

H. S. & Co.

### Suit Case Pattern

These chests are substantially made of ash, with locked corners and leather handles and are conveniently shaped for carrying. All tops are divided as in illustration.

Nos. ....	B	2B	XB
Approximate length inside, inches.....	32	27	32
Approximate width inside, inches.....	11 $\frac{1}{4}$	9	12 $\frac{1}{2}$
Approximate depth inside, inches.....	5 $\frac{3}{4}$	6 $\frac{1}{2}$	7
Each .....	\$5.00	4.30	6.00

## KENNEDY ALL-STEEL TOOL KITS

### Carpenter's Cases

These cases are made of steel, but are lined with wood veneer to protect sharp tools. They are made so that rain will not get into them.

Equipped with two drawers for small tools, a level holder and there is room in No. 31A for a square.

The saw rack which is hinged to the lid will carry four 28 inch saws. Each kit packed in individual carton.

Nos. ....	31A	31C
Size, inches....	32x7x15	32x11x6
Net weight, lbs.	20 $\frac{3}{4}$	16 $\frac{3}{4}$
Each .....	\$9.20	7.80

### Combination Case

Equipped with two trays. Top tray fitted with folding handle so it may be used as a tote tray. Lower tray divided for small parts and tools. Space under tray is large enough to carry a complete assortment of tools. A strong, well made kit for many uses. Packed in individual carton.

No. 716—Size 16x8x9 inches; net weight 11 $\frac{1}{4}$  lbs.....Each \$5.20

Prices Subject to Market Changes

Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect

## KENNEDY ALL-STEEL TOOL KITS

**Mechanics Kit, Bag Shaped**

For garage mechanics, repairmen, electricians and others. Easy to carry; has handy divided tray for small parts. Strongly reinforced and will withstand years of hard usage. Has leather handle, side catches, corner irons and multiple change lock. Packed in individual carton.

Nos. ....	114	118
Size, inches...	14x7x9	18x10x13
Net wt., lbs...	6¼	10¾
Each .....	\$4.20	4.60

**Flat Top Kits**

Divided tray extends only part of length of kit, having room in end of kit for blow torch. Especially desirable for electricians, linemen and repairmen. Ends double seamed; multiple change lock, side catches and corner irons. Packed in individual carton.

No. 321—Size 21x8x9 inches; net weight 10 pounds... Each \$4.60

**General Mechanics Kit**

For garage mechanics, electricians, plumbers, repairmen, etc. The four trays are linked to lids and swing out as lids are opened. Trays arranged for small tools and parts used most. When closed, top trays fit flush over lower trays. Trays work smoothly and easily. Leather handle, side catches and multiple change locks. Packed in individual carton.

No. 1018—Size 18x10x12½ inches; net weight 15½ pounds.....  
.....Each \$6.40

**Flat Top Kits**

Tray may be divided into any size compartments desired by tacking light wood partitions in place. Ends double seamed, reinforced throughout. Leather handle and multiple change lock. Packed in individual carton.

Nos.	Size, inches	Net Weight, lbs.	Each

## BLOW TORCHES

### Bernz "Always Reliable"

**Gasoline-Kerosene**

Burner is a patented style which produces a perfect blue, hot flame in short time. All parts can be cleaned quickly and thoroughly. Nickel plated wire wheel does not get hot, and is indestructible. Seamless steel nipple, dip tube and wick. Soldering iron hook cast bronze, can be unscrewed when not required.

Pump "Neverleak" style and fitted into reservoir. Plunger screws down and out of the way. Needle point at bottom of plunger acts as a double check.

Reservoir and bottom of heavy drawn sheet brass, reinforced on inside at top with long wide brace; polished and lacquered. Bottom funnel-shaped, permits quick refilling.

Blunt burner needle,  $\frac{1}{4}$  inch steel rod. No orifice to be enlarged. Double stuffing box nut prevents user from unscrewing needle completely. Gasoline burner block is screwed into burner, and kerosene burner block is screwed into filler plug. Reverse when using kerosene. Folding pocket with three cleaning needles in handle.

**No. 79**—Capacity 1 quart; net weight  $4\frac{3}{4}$  pounds...Each \$7.20

**Gasoline**

Burner is closed, one-piece, under-flow type, produces a steady, blue, hot flame quickly. Needle made of  $\frac{1}{4}$  inch steel rod. Handle is an iron casting, nickel plated, and is indestructible. Also fitted with a seamless steel nipple, dip tube, and wick. Soldering iron hook is cast bronze and can be unscrewed when not required.

Pump "Neverleak" style and fitted into reservoir. Plunger screws down and out of the way. Needle point at bottom of plunger acts as a double check.

Reservoir and bottom of heavy drawn sheet brass, reinforced on inside at top; polished and lacquered. Bottom funnel-shaped, permits quick refilling.

**No. 87**—Capacity 1 quart; net weight 4 pounds...Each \$4.75

*Prices Subject to Market Changes*

## ALCOHOL TORCHES Bernz "Always Reliable"

### Self-Blowing

Heavy drawn brass reservoir, polished and lacquered. Top concave and answers as drip cup. Bottom cast brass and has legs. Brass filler plug. Burner brazed into reservoir and fitted with burner block. Two size nozzles furnished; one for needle point flame and one for larger flame. Burns in any angle. Safety cap fits snugly over burner. Vent screw relieves pressure. Handles fold around reservoir. Holder for nozzles.

No. 30—Capacity  $\frac{1}{4}$  pint; net weight  $\frac{3}{4}$  pound....Each \$2.50

## SOLDERING OUTFITS

### For the Household or Workshop

Contains 4 oz. can Tinol solder in paste form and self-acting blow torch, packed in neat box, with full directions inside. With this handy outfit any one can make a perfect soldered joint, without any previous experience, on all metals, except aluminum.

Complete .....Each \$1.50

## ELECTRIC GLUE POTS

### Delta

High grade electric glue pot. Has low, medium and high temperature switch. Heavy spun seamless inside copper pot. Will operate on either A.C. or D.C. current.

No. 215—For 110 volt current; complete with 6 foot asbestos cord and separable plug; shipping weight 4 pounds.

Each .....\$7.25

## SOLDERING COPPERS

### Adroit Electric

### Double Duty

For radio, home and light factory use. Approved heater cord; two-piece attachment plug; interchangeable tips, that can be replaced when worn out; alloy heating element, that will not overheat and gives the desired results at all times.

Each .....\$2.50

Extra standard tips....Each .45

Special straight tips extra .....

.....Each .45

Special bent tips extra..Each .45

## ELECTRIC SOLDERING IRONS

## Vulcan

The "Vulcan" Tools are equipped with 6 foot flexible cords and separable attachment plugs and can be connected to any lighting socket. They will operate with identical results on either A.C. or D.C. and are wound for standard voltages, of 104, 110, 115, 120, 125, 220 and 230 volts. An extra charge of \$1.00 is made for special voltages. Each tip is accurately machined with a bevel which fits the corresponding bevel in the end of the heater, providing a valve seat joint of exceptional efficiency in the conduction of heat and also, by sealing the chamber into which the tip screws, protecting the surfaces thus enclosed from corrosion.

All Vulcan windings are hermetically sealed, giving protection against damage by flux fumes, oxidation and water. They deliver constant ample heat for perfect soldering throughout a long life.

Note—Always specify voltage when ordering.

No. 10

No. 30

The Nos. 10 and 30 are equipped with a ventilated, adjustable handle by which the tool can be lengthened or shortened at will.

- No. 10—44 watts; equal to old style copper, 1 lb. per pair; length, adjustable to 12 inches; net weight 10 oz.; diameter of tip  $\frac{1}{8}$  inch; for radio and home use, also light factory soldering; complete.....Each \$3.75  
Extra Tip .....Each .30
- No. 30—60 watts; equal to old style copper, 1 lb. per pair; length, adjustable to 12 inches; net weight 10 oz.; diameter of tip  $\frac{1}{8}$  inches; for radio and home use, also light factory soldering; complete.....Each \$6.25  
Extra Tip .....Each .40
- No. 600—44 watts; equal to old style copper, 1 lb. per pair; length 13 $\frac{1}{2}$  inches; net weight 14 oz.; diameter of tip  $\frac{1}{8}$  inch; for finest instruments, smallest fuses, light telephone repairs, radio and all very light soldering; complete.....Each \$7.50  
Extra Tip .....Each .30
- No. 700—55 watts; equal to old style copper, 1 $\frac{1}{2}$  lbs. per pair; length 10 inches; net weight 14 oz.; diameter of tip  $\frac{1}{2}$  inch; for radio and home use, fuses, instruments, inspectors' or linemen's tool kits, etc.; complete.....Each \$7.50  
Extra Tip .....Each .45
- No. 100—70 watts; equal to old style copper, 1 $\frac{1}{2}$  lbs. per pair; length 13 $\frac{1}{2}$  inches; net weight 16 oz.; diameter of top  $\frac{1}{2}$  inch; for telephone switchboards, electrical instruments, light manufacturing, fuses and radio apparatus; complete.....Each \$8.00  
Extra Tip .....Each .50
- No. 500—120 watts; equal to old style copper, 2 lbs. per pair; length 11 $\frac{1}{2}$  inches; net weight 19 oz.; diameter of tip  $\frac{1}{2}$  inch; for fast telephone work, art glass, light automobile repairs, light tinware and general home use; complete.....Each \$9.60  
Extra Tip .....Each .75
- No. 200—150 watts; equal to old style copper, 3 lbs. per pair; length 14 $\frac{1}{2}$  inches; net weight 24 oz.; diameter of tip  $\frac{1}{2}$  inch; for about the same as No. 500, but 2 $\frac{1}{2}$  inches longer; complete.....Each \$10.50  
Extra Tip .....Each .80
- No. 300—250 watts; equal to old style copper, 4 $\frac{1}{2}$  lbs. per pair; length 14 $\frac{1}{2}$  inches; net weight 35 oz.; diameter of tip 1 $\frac{1}{2}$  inches; for medium tinware, general manufacturing, metal patterns, automobile work, etc.; complete.....Each \$13.00  
Extra Tip .....Each 1.25

## WIRE NIPPERS

Utica Bulldog

### No. 60—End Cutting, Lap Joint

Used by carpenters, shoemakers, machinists, etc. Drop forged steel, tempered cutting edges: blue gun metal finish checkered handles, polished head.

Size, inches.	5	6	7	8
Each .....	\$0.85	.95	1.10	1.30

### Utica Diagonal Cutting

### Lap Joint

Used by telephone men, switch-board builders and electricians in assembling electrical apparatus. Will cut silk covered wire without injuring the covering or bruising the wire. Blue gun metal finish handles, polished head.

No. 41—Size, in...	5	6
Each .....	\$1.15	1.40

### Vacuum Grip, Diagonal Cutting

### Lap Joint

Forged from Swedish tool steel individually hardened and tempered. Hand filed cutting edges. Used by electricians, radio and telephone men. Full polished.

Nos. ....	85	86
Inches .....	5	6
Each .....	\$1.40	1.70

Prices Subject to Market Changes

## PLIERS

Utica Flat Nose, Side Cutting

### No. 1050—Lap Joint

A good tool for electrical construction work. Drop forged steel; smooth handles, black finish, polished head.

Size, inches.	5	6	7	8
Each .....	\$0.75	.85	.90	1.00

### Utica Long Needle Nose, Side Cutting

### Lap Joint

Adapted for extra fine work, radio, etc. Forged from extra quality of steel; spring tempered nose and keen, strong cutting edges. Drop forged steel, blue gun metal finish checkered handles, polished head.

No. 655—Size, in...	5 1/4	6
Each .....	\$1.20	1.30

### Vacuum Grip

Forged steel; adjustable slide joint; nickel plated.

# SCREW EXTRACTORS

## Ezy-Out

A tool expressly designed for the quick and easy removal of broken set and cap screws, studs, stay bolts, pipe

fittings, etc. Merely drill hole in broken screw, insert proper size Extractor—twisting it as though tapping with a left hand tap. The twist forces spirals to grip sides of drilled hole and then, as additional force is brought to bear on tap wrench, the screw begins to “come”—after which it is an easy matter to spin it out on its own threads just as if it had never broken off at all. The whole operation is accomplished without endangering the threads of the hole.

No. 192—Size No.	1	2	3	4	5	6
Diam. at small end, in....	.054	.080	$\frac{1}{8}$	$\frac{3}{16}$	$\frac{1}{4}$	$\frac{5}{16}$

## TAP WRENCHES

### Starrett T Handle

Used by toolmakers, machinists and motor mechanics for holding taps to be turned by hand; also for holding drills, reamers and other small tools. Body centered, enabling use on lathe centers, or in upright drilling machine to start tap straight. Construction permits jaws to conform to piece to be held, making it rigid and less apt to become loose. Jaws and knurled clamping nuts heat-treated. No. 93C made with sliding handle.

Nos.	Capacity, in.	Each
93A	$\frac{1}{16}$ to $\frac{1}{8}$ square	\$0.85
93B	$\frac{1}{8}$ to $\frac{1}{4}$ square	1.05
93C	$\frac{1}{4}$ to $\frac{1}{2}$ square	1.90

### Yankee Ratchet

Work in close quarters, corners and inaccessible places. The ratchet is same as used in other “Yankee” tools and is set for left hand, right hand, or rigid, by simply moving shifter. Cross bar held by friction lock, can be pulled out. Thumb nut at top can be used in starting tap. Countersunk hole in top for lathe or drill-press center.

Nos.	250	251
holds taps up to, in..	$\frac{1}{8}$	$\frac{1}{8}$
O. D. of chuck, in...	$\frac{3}{4}$	$\frac{7}{8}$

## PIPE STOCKS AND DIES

Genuine Armstrong Improved Adjustable

## American Standard (Briggs) Right Hand Threads

Sets consists of a stock complete with dies, guides and wrench, packed in a wood box.

Dies can be adjusted to variations in size of fittings. Double taper, the taper at entrance for first few threads is greater in degree than standard taper, which forms a lead to the dies, causing them to start on the pipe without filing, even when there is a swell or burr, and requiring no pressure to start dies on pipe. Dies are interchangeable in the stocks.

No. 1

No. 2

## Two Arm Style

No. 1—Four pipe dies, right hand thread; for threading pipe  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$  and  $\frac{1}{2}$  inch; weight each  $4\frac{1}{2}$  pounds.....Each \$5.60

No. 2—Five pipe dies, right hand thread; for threading pipe  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$  and 1 inch; weight each  $12\frac{1}{2}$  pounds.....Each \$7.45

## Two Arm Style

No. 2½—Two pipe dies (double ended), right hand thread; for threading pipe  $\frac{1}{2}$  and  $\frac{3}{4}$ , 1 and  $1\frac{1}{4}$  inch; weight  $14\frac{1}{4}$  pounds.  
.....Each \$8.70

## Two Arm Style

No. 3—Three pipe dies, right hand thread; for threading pipe  $1\frac{1}{4}$ ,  $1\frac{1}{2}$  and 2 inch; weight 31 pounds .....Each \$11.00

Note—These pipe stocks will also take Armstrong bolt and tubing dies.

Prices Subject to Market Changes

## TOLEDO PIPE THREADING DEVICES

American Standard (Briggs) Right Hand Threads

No. 00—Ratchet

Capacity  $\frac{1}{8}$  to  $\frac{3}{4}$  inch pipe.

Consists of ratchet handle for holding a series of die heads, which heads also include a ratchet gear forming the bushing for the given size of pipe. To change from one size to the other simply involves pulling on the pawl button, allowing one head to drop out and another to be replaced. Die segments removable for regrinding or replacement.

No. 00—Complete, including die heads for threading  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$  and  $\frac{3}{4}$  inch pipe; length 14 inches; net weight 9 pounds.

Per Set .....\$12.35

One set in a box; shipping weight 10 pounds.

No. 1—Adjustable, Plain

Capacity 1 to 2 inch pipe.

The peak of perfection in pipe threading tools. It threads 1,  $1\frac{1}{4}$ ,  $1\frac{1}{2}$  and 2 inch pipe and does its work so easily that a boy can operate it. Has a minimum of working parts, is exceedingly strong and durable and will stand years of service.

No. 1—Complete, for threading 1,  $1\frac{1}{4}$ ,  $1\frac{1}{2}$  and 2 inch pipe; net weight 19 pounds....Set \$ 9.60

No. 1A—With ratchet...Set 12.00

**Note**—Also made reversed in all its parts for cutting left hand threads, but neither tool will do both.

One set in a box; shipping weight 23 pounds.

## COMBINATION WRENCH SETS

Williams

Consists of Midget "Superrenches" (Chrome-Molybdenum), Combination Tee, Handy Grip and Hexagon Sockets

A combination of Williams' Midget "Superrenches" and Socket wrenches providing a handful of helpfulness on electrical jobs; unequalled in cramped quarters and for delicate adjustments. The only assortment of Open-end and Socket wrenches in Midget size for such service. Electricians, mechanics, motorists and radio-fans need this convenient set.

Midget "Superrenches" are extremely light and thin, yet amazingly strong. Each wrench has two openings of the same size—but at different angles (15° and 75°). Where one head can't operate, the other will. Forged from Chrome-Molybdenum steel, the strongest and toughest material for the purpose ever made. Furnished heat-treated and Chrome-Finished, with heads buffed bright.

Sockets tapered for work in close corners. Made from high grade steel, scientifically heat-treated to insure a uniform product. Full bright nickel finish. The Handy Grip has swivel for real speed; it can also be used as an extension.

## Contents of Set

No.	Openings Milled	Extreme Length	Thick- ness Heads
1114	$\frac{3}{32}$ & $\frac{5}{32}$	.3	$\frac{3}{32}$

Prices Subject to Market Changes

## AUTOMOTIVE OBSTRUCTION WRENCH SET

### Williams "Superrench" (Chrome-Molybdenum)

Set consists of five "Superrenches" with ten different openings from  $\frac{3}{8}$  to  $\frac{7}{8}$  inch—no duplication of openings. It will fit all S.A.E. Standard nuts and cap screws  $\frac{1}{4}$  to  $\frac{7}{8}$  inch, all U. S. Standard nuts  $\frac{1}{4}$  to  $\frac{1}{2}$  inch and hex cap screws  $\frac{3}{8}$  to  $\frac{5}{8}$  inch.

Ordinary wrenches can't reach or turn many awkwardly placed nuts unless interfering parts are first removed. But Williams' new Obstruction "Superrench" will. Its narrow, pointed jaws, and thin heads with 75° angle of openings are specially designed for just such jobs. Where you're short one clearance, it's long on service.

Furnished heat-treated and chrome-finished, with heads buffed bright. Every wrench guaranteed against breakage.

No.	For U. S. Std. Nuts; Size Bolts	For Hex. Head Cap Screws; Diam. Screws	For S.A.E. Std. Nuts and Cap Screws; Size Bolts	Openings Milled	Ex-treme Length, Approx.	Thick-ness Heads	Each Chrome-Fin-ished,

## HEXAGON WRENCH SPINTITES

### The Socket Wrench for Little Nuts

#### Works Like a Screw Driver

Little nuts! Millions of them to be tightened everywhere. In the home, in the radio shop, the electrical shop, in the industrial plant, on the automobile. Every work bench, every tool kit, needs Spintites. Used by the big radio and car manufacturers for years.

There's a feel to Spintite "nut drivers" no tool user can resist. Built like a screw driver with a thin-walled hexagon socket on the end. Hollow shank so the socket will reach down over the bolt and grip the nut.

## • INTERCHANGEABLE SOCKET WRENCH SETS

Mossberg, Pressel Steel

### No. 10—Socket Wrench Set

No. 10—Consists of pieces as described below; in enameled steel box, frostine finish, size  $2\frac{1}{8} \times 5\frac{1}{2} \times 10\frac{1}{8}$  inches; shipping weight 8 pounds..Per Set \$6.65

Packed in corrugated carton.

#### Contents of No. 10 Set

- No. 350—Reversible Ratchet Wrench
- No. 351—Extension Bar,  $9\frac{1}{2}$  in. long
- No. 336—Universal Joint
- No. 101—Offset Screw Driver
- 21 Sockets of guaranteed quality:  
hex.:  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{3}{4}$ ,  $\frac{7}{8}$ ,  $1$ ,  $1\frac{1}{8}$ ,  $1\frac{1}{4}$ ,  $1\frac{1}{2}$ ,  $1\frac{3}{4}$  and  $2$  inch
- Two Special Hexagon Spark Plug Sockets:
- No. 402, 4 inches long,  $\frac{5}{8}$  inch opening
- No. 422—4 inches long,  $1\frac{1}{2}$  inch opening.
- Fitting standard spark plugs.

### No. 13—Socket Wrench Set

No. 13—Consists of pieces as described below; in enameled steel box, frostine finish, size  $2\frac{1}{8} \times 4\frac{1}{4} \times 10\frac{1}{8}$  inches; shipping weight  $5\frac{1}{4}$  pounds.

Per Set .....\$4.70

Packed in corrugated carton.

#### Contents of No. 13 Set

- No. 355—Ratchet Handle, 8 in. long
- No. 351—Extension Bar,  $9\frac{3}{8}$  in. long
- 15 Sockets of steel; hex. openings,  
 $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{3}{4}$ ,  $\frac{7}{8}$ ,  $1$ ,  $1\frac{1}{8}$ ,  $1\frac{1}{4}$ ,  $1\frac{1}{2}$ ,  $1\frac{3}{4}$  and  $2$  inches.
- One  $\frac{1}{2}$  inch Hexagon Spark Plug Socket, No. 402, 4 inches long

#### Socket Construction

Drawn by pressure from cold rolled steel, thereby retaining the necessary long grain in structure. Mottled and lacquered finish.

*Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect*

## REVOLVING SPRING PUNCHES

Bernard

## Adjustable Gauge

Gauge makes it possible to punch holes at uniform distances from edge of leather. Parallel action jaws give punch tubes a straight downward thrust from start to finish of operation. Revolving head turns between two steel arms which hold it firmly in position so tubes always hit on center.

Warranted crucible steel; automatic spring action; open throat; parallel jaws; full nickel plated.

No. 186—Length 8 inches; equipped with Nos. 1 to 6 screw tubes, cutting holes  $\frac{1}{8}$ ,  $\frac{3}{16}$ ,  $\frac{1}{4}$ ,  $\frac{5}{16}$ ,  $\frac{3}{8}$  and  $\frac{7}{8}$  inch.....Each \$3.85

H. S. &amp; Co.

## Four Tubes

Drop forged steel, polished; flat steel spring; bar steel rollers; fitted joints; hardened and tempered screw tubes.

## CENTER PUNCHES

### Starrett Automatic

#### Adjustable Stroke

Contains a mechanism which automatically strikes a blow of any required force when the punch is in the exact position desired by the operator. It is provided with a knurled adjustable screw cap, which, working in connection with a spring, regulates the stroke. For work requiring a heavy mark, turn cap down; for work requiring a light mark, turn it up. To use it, no hammer is needed. The punch being placed in an upright position over the working line, a downward pressure releases the striking block and makes the impression without danger of slipping, as is liable when a hammer is used. When adjusted for either light or heavy stroke, all indentations are of a uniform size for the starting of the drill, etc., and more accurate and quicker work may be done as required on delicate work in tool making. The working parts are hardened, durable and accessible for such repairs as may be ever needed. The adjustable cap fits the hand, with no stroke adjusting screw through and above it to bother. The point can be removed for regrinding and easily replaced.

**MICROMETER CALIPERS**

Starrett

Range 0 to 1 inch

For measurement by thousandths up to 1 inch. The frame is cut out for use in place where the ordinary frame cannot be inserted. The width of the anvil end of the frame is approximately  $\frac{1}{16}$  inch. Has lock nut and ratchet stop.

No. 230—With ratchet stop but without case.....Each \$8.50

**Starrett Micrometer Features**

The lock nut, which by a slight turn locks spindle firmly the ratchet, permitting same degree of pressure at points of contact in measuring; the decimal equivalents of 8ths, 16ths, 32ds and 64ths, on frame, or on thimble; the quick adjusting micrometer, reducing time in reading from 1 inch to 0 or forty complete turns of screw to an instant; the concave cut in frame back of anvil for insertion where the ordinary style will not go.

**Ratchet Stop**

In using this device, the ratchet slips by the pawl when more than a certain amount of pressure is applied, and so prevents the spindle from turning further and perhaps springing the instrument.

It is valuable where a number of measurements have to be taken quickly, and especially where measurements are taken by more than one person with the same caliper, as by its use the same amount of pressure is applied in each case to the objects measured.

**STAIR GAUGE FIXTURES**

Starrett

These fixtures can be readily clamped to a carpenter's steel square to form a gauge for various uses, as in stairs, valley cuts, hip and rafter work.

Sketch A shows the gauge as applied for laying out a stair stringer; sketch B, laying off hexagon angles; sketch C, as used as a center gauge or in quartering a circle.

No. 111—Fixtures are light, neat and efficient....Per Pair \$0.80

A small set of  $\frac{3}{4}$  inch hexagonal fixtures for the carpenters' steel square. Can be quickly clamped in place on the blade, to lay out angles for stair stringers, sawing, etc.

No. 470—White nickel finish; brass set screws; natural finish .....Per Pair \$0.45

# COMBINATION SQUARES Starrett

No. 11

No. 33

## Hardened Blade, No. 4 Graduations

No. 4 graduations, 8ths, 16ths, 32ds and 64ths, with heavy figures reading both ways.

Every tool warranted accurate. With the adjustable blade this forms one of the most convenient and useful tools ever devised for machinists' use. It is a complete substitute for a whole set of common try squares, and is one of the best gauges made for transferring exact measurements or laying out work. It is also convenient for a depth gauge, or to square in a mortise. For a mitre it is perfect, while with the auxiliary center head it forms a centering square, both inside and outside, which for convenience and accuracy has no equal. The 6, 9, 12 and 18 inch stocks are fitted with levels as shown in the above cut. The 4 inch stock has no level. The 18 inch has the same stock and center head as the 12 inch. Sent complete with center head unless otherwise ordered.

No. 11—Size, inches.....	4	6	9	12	18
With Center Head.....Each, \$....		2.00	2.55	3.10	3.85
Without Center Head....Each, 1.30		1.55	2.00	2.55	3.30

## Drop Forged Steel

With hardened heads and hardened blades. Both stock and center head are hardened as well as the blade. No. 4 graduations, 8ths, 16ths, 32ds and 64ths, with heavy figures reading both ways. Sent complete with center head unless otherwise ordered.

No. 33—Size, inches .....	6	9	12
With Center Head.....Each, \$3.30		3.85	4.10
Without Center Head.....Each, 2.55		3.10	3.30

Showing a few of the many uses of the combination square.

## COMBINATION SQUARE SETS

Starrett

The combination square met with such universal approval from machinists that it was but a step to add to it the protractor head and have a combination set, made up of the rule on which slide the square, center and protractor heads. This makes possible more varieties of uses in laying out and testing work than are possible with any other instrument used by mechanics.

## With Hardened Blade

Consists of No. 11 combination square with center head and No. 12, 7 inch bevel protractor all on the No. 11 square blade; protractor head extends on one side of blade only. No. 4 graduations 8ths, 16ths, 32ds and 64ths.

**Note**—See foot notes for descriptions of protractor.

No. 9—Size, inches.. 9 12  
Per Set (Complete).. \$5.10 5.60

## Description of Protractors Furnished in Above Sets

Set No. 9—Protractor No. 12. Length 7 inches. Revolving turret graduated in degrees from 0 to 180, both right and left, and can be accurately adjusted to show any angle. Small level attached to head, adjustable to show any degree.

Set No. 433—Protractor No. 492. Same as No. 12, except head made with smooth finish and match finish of No. 33 combination squares.

Set No. 434—Protractor No. 490. Same as No. 12 with the additional feature of having head extend both sides of blade. This greatly increases the usefulness of the tool, as the same angles may be transferred from either side of frame without resetting. Fine smooth finish to match finish No. 33 combination squares.

**Prices Subject to Market Changes**

## With Hardened Blade

Set consists of No. 33 Combination square with hardened drop forged stock and center head and No. 492, 7 inch Protractor head. No. 4 graduations, 8ths, 16ths, 32ds and 64ths.

**Note**—See foot notes for description of protractor.

Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect

## ELECTRIC DRILLS

Millers Falls

**1/4 Inch Light Duty No. 214**

A powerful, light and exceptionally well-balanced drill with excellent ventilation. Designed for light and intermittent service.

**Motor**—Universal for D. C. or A. C. up to 60 cycles.

**Speed**—No load, 1800 R. P. M.  
Full load, 1000 R. P. M.

**Capacity**—1/4 inch in steel.

**Specifications**—1/4 in. Jacobs chuck. Heat treated alloy steel gears, spindle and shaft. Ball thrust bearing on spindle. Switch mounted on handle. Armored attachment plug. Aluminum housing efficiently ventilated. Brushes easily replaced from outside without taking tool apart. 12 feet best quality rubber covered cord furnished. Spindle offset for close boring, 1/2 inch from outside of housing. Weight 5 pounds net. Over all length, 12 inches. Furnished in 22, 110, 150, 220 and 250 volt.

**No. 214 Drill**.....Each \$25.00

Special speed of 3000 R. P. M.  
Extra .....\$2.50

**1/2 Inch No. 516**

Perfectly balanced and built to withstand the severest use in continuous production work.

**Motor**—Universal for D. C. or A. C. up to 60 cycles.

**Speed**—No load, 1500 R. P. M.  
Full load, 800 R. P. M.

**Capacity**—1/2 inch in steel.

**Specifications**—1/2 in. Jacobs chuck. Heat treated alloy steel gears, spindle and shaft. Ball bearing motor shaft. Ball thrust bearing on spindle. Automatic toggle switch with catch for continuous operation on drill stand. 12 feet best quality rubber covered cord and attachment plug. Spring clip for chuck wrench. Pigtail brushes replaced from outside. Net weight, 7 1/2 pounds. Over all length 14 inches. Keyless chuck optional equipment.

**No. 516 Drill**.....Each \$45.00

Special speed of 2000 R. P. M.  
Extra .....\$2.50

Three wire cord for ground connection optional.

*Prices Subject to Market Changes*

## ELECTRIC DRILLS

### Millers Falls

**1/2 Inch Standard No. 312**

The features of this 1/2 inch Standard drill are its powerful ball bearing motor, extremely good ventilation, light weight and rugged construction. This is an ideal tool for millwrights, electricians, plumbers and automotive repairmen.

**Motor**—Universal for D. C. or A. C. up to 60 cycles.

**Speed**—No load, 475 R. P. M. Full load, 300 R. P. M.

**Capacity**—1/2 inch in steel.

**Specifications**—1/2 inch three jaw chuck. Heat treated alloy steel gears. Ball bearing motor. Ball thrust bearing on spindle. Double pole, double break safety switch with catch for continuous operation. Pigtail brushes easily replaced from outside. Spring clip for holding chuck wrench in handle. Combination adjustable breast plate and spade handle. 15 feet rubber covered cord with attachment plug. Net weight 14 pounds. Over all length 17 inches. Furnished in 32, 110, 220 and 250 volt.

**No. 312 Drill.....Each \$45.00**

Three wire cord for ground connection optional.

**3/8 Inch No. 538**

Light, powerful drill with chuck capacity of 3/8 inch. Has spade handle breast plate and can be furnished with auxiliary handle if desired.

**Motor**—Universal for D. C. or A. C. up to 60 cycles.

**Speed**—No load, 1000 R. P. M. Full load, 600 R. P. M.

**Capacity**—3/8 inch in steel.

**Specifications**—3/8 in. Jacobs chuck. Heat treated alloy steel gears. Ball thrust bearing on spindle. Ball bearing motor shaft. Phosphor bronze bushings. Double pole, double break safety switch with catch for continuous operation. Armored attachment plug. Aluminum housing efficiently ventilated. Pigtail brushes easily replaced from outside without taking tool apart. Grease lubrication. Spring clip for holding chuck wrench. 15 feet best quality rubber covered cord. Adjustable spade handle and breast plate. Weight 13 3/4 pounds net. Over all length 18 inches. Can be furnished with auxiliary side handle if desired. Furnished in 32, 110, 150, 220 and 250 volt. Unless otherwise specified 110 volt will be furnished.

**No. 538 Drill.....Each \$58.00**

Three wire cord for ground connection optional.

**Prices Subject to Market Changes**

**Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect**

## BENCH DRILL STANDS

### Millers Falls

#### Without Drill

Can be used for converting any Millers Falls electric drill above  $\frac{1}{8}$  inch capacity, into a convenient drill press. Bracket to which drill is attached, permits lowering or raising drill on the precision ground tubular column. Radial adjustment about the column made in same manner. Height of column over all 36 inches, maximum distance between chuck and base 16 inches, base 10x10 inches; two tee bolts for holding work.

**No. 1238**—Finished in black and red enamel; weight without drill 77½ pounds..Each \$18.00

#### Without Drill

This bench drill stand has been put on the market to increase the usefulness of electric drills Nos. 214,  $\frac{1}{4}$  inch, and 516,  $\frac{1}{8}$  inch. The height of the column over all is 28 inches. The base is 9x8 inches and has four holes for fastening work. The maximum distance from chuck to base is 13¼ inches.

**No. 1514**—Finished in black and red enamel; weight without drill 35½ pounds.....Each \$14.00

#### Without Drill

This stand makes use of electric drills Nos. 214,  $\frac{1}{4}$  inch, and No. 516,  $\frac{1}{8}$  inch. Can be used for a large number of purposes, including grinding and buffing. When used with 4x½ inch grinding wheel small tools can be sharpened rapidly. Stand fastens to bench by screws and drill is held in stand by clamp and thumb screw, so it may be used either on bench or portably without waste of time.

**No. 1014**—Finished in black enamel; weight 2½ pounds....Each \$2.50

*Prices Subject to Market Changes*

# DELTA 6 INCH CIRCULAR SAW UNIT

Ideal for a great variety of work. Will do ripping, cross-cutting, grooving, plowing, plain and compound mitering to exact length, dadoing, cutting mouldings, tenoning, slotting, etc.

Table 12x14 $\frac{1}{4}$  inches, tilts 45° to left. Rip gage 1 $\frac{1}{4}$ x16 extends clear across table. Miterage 1 $\frac{1}{2}$ x6 inches, 0° to 60° both sides. Atkins 6 inch blade, will rip or cross cut pieces up to 1 $\frac{3}{4}$  inches thick. Motor base arranged so all other parts of Handi-Shop may be added later, also scroll saw lathe bed, etc.

No. 160—Unit, complete with motor No. 400 for 110 volt A. C., 60 cycle current with No. 133 blade, No. 53 V belt and No. 172 pulley; shipping weight 90 pounds.....Each \$42.00

No. 162—Saw only, with No. 172 pulley and No. 53 "V" belt; motor, cord and plug and motor base not included; shipping weight 45 pounds..Each \$21.25

## Short U-Bed

Used to attach No. 160 circular saw motor unit and No. 70 scroll saw motor unit where there is no regular lathe bed. Also to attach tilting sanding table. Bed slotted for quick removal of table. No. 154—Shipping weight 4 lbs. ....Each \$2.00

# DELTA MOULDING CUTTERS

Illustration shows a few of the many styles of moulding which can be made with these cutters.

No. 246—Moulding cutter set to fit  $\frac{1}{4}$  inch arbor of 6 inch Delta circular saw No. 162; complete as shown above with 4 sets of "High Speed" cutters, table insert, guide fence, collar, wrench and directions; shipping weight 7 pounds.....Set \$15.00

No. 248—Same as above but larger; fits  $\frac{3}{8}$  inch arbor of No. 318 Delta 8 inch circular saw; (same cutters); shipping weight 8 pounds.....Set \$15.75

Note—Deduct \$2.50 if guide fence is not wanted.

Prices Subject to Market Changes

Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect

## DELTA FOUR SPEED LATHES

**Capacity**—9 inches diameter over bed, 36 inches between centers,  $\frac{1}{2}$  inch spindles.

Any  $\frac{1}{4}$  H. P. constant speed motor will furnish ample power. With drive pulley rotating at speed of 1750 R.P.M. lathe has 4 speeds—750, 1250, 1750 and 2250 R.P.M.

Any Delta lathe and standing attachments will fit. Can use Handi-Shop lathe bed and chanve over to 4 speed lathe by adding headstock, drive pulley and V-belt. Motor may be mounted as shown or to rear or above lathe. Headstock pulley can be reversed. Spindle runs in long bearings with automatic wick oiling. Two enclosed ball thrust bearings take care of thrust in both directions.

Pieces almost 14 in. diameter may be turned by attaching face plate as shown. Use slow speed. Tool support base blocked up to proper height.

- No. 277**—As illustrated with all attachments except without motor, "V" belt and motor drive pulley, also not mounted on board; shipping weight 50 pounds.....Each \$24.45
- No. 286**—"V" belt; distance between pulleys center to center 12 $\frac{1}{2}$  inches; shipping weight  $\frac{1}{2}$  pound.....Each \$1.15
- No. 288**—Motor drive pulley, 4 step; fits any  $\frac{1}{2}$  inch motor shaft; ( $\frac{3}{8}$  and  $\frac{1}{4}$  inch bores at same price); ship. weight 3 lbs..Each, \$1.50
- No. 280**—Headstock only; shipping weight 18 $\frac{1}{2}$  pounds....Each 8.75

## DELTA ELECTRIC LATHE

**Capacity**—9 inch diam. swing, 36 inches between centers.

**Motor**— $\frac{1}{4}$  H. P., 110 V., A.C. 60 cycle, double shaft, mounted on heavy iron base, speed 1750 R. P. M.

With ball bearing tailstock, thrust bearing, tool support base, 3 and 6 inch tool support, face plate, drive center, cup center, extension wrench, box wrench, cord and plug. Completely assembled on 8x54 inch 5-ply veneer board ready for work.

- No. 270**—Net weight 65 lbs., shipping weight 90 lbs.....Each \$40.50  
Add \$5.00 if with D. C. motor, 115 volts.

*Prices Subject to Market Changes*

## DELTA ELECTRIC HANDI-SHOP

Consists of motor, circular saw, scroll saw, lathe, lathe attachments, sanding attachments, turning tools, blue prints and directions. Completely assembled, properly lined up and mounted on 5-ply veneer base, ready to operate. Length over all 65 inches, height 12 inches, width 18 inches. Packed in heavy iron strapped box ready for reshipment. Shipping weight 182 pounds.

**With A. C. Motor**

No. 235AC—Motor No. 400, 110 V.,  
60 cycles, speed 1725 R. P. M.  
.....Each \$99.50

**With D. C. Motor**

No. 235DC—Motor No. 407, 115 V.,  
speed 1750 R. P. M.....  
.....Each \$104.50

**General Specifications**

**Motor**—Special  $\frac{1}{2}$  H. P., with two shafts,  $\frac{1}{2} \times 1\frac{1}{2}$  inches. Develops more than  $\frac{1}{2}$  H. P. before stalling.

**Lathe**—Capacity 9 inches diameter, 36 inches long between centers. U-shape steel bed. Ball bearing tail stock, holds either dead center, drill chuck or face plate. Tool support base, 18 inch double tool support, 6 and 3 inch single supports, ball thrust bearing, face plate, drive center, dead center, extension and box wrenches.

**Lathe Attachments**—5 inch emery wheel, 6 inch buffing wheel,  $\frac{1}{2}$  inch capacity chuck fits on motor shaft, circular saw arbor and tailstock. One spear point and one gouge turning tool with  $8\frac{1}{2}$  inch long handles. Emery wheel arbor.

**Sanding Attachments**—Sanding drum,  $8\frac{1}{2}$  inch diameter sanding disc with garnet paper disc. Sanding table  $5 \times 12$  inches, can be tilted 45 degrees down, 15 degrees up and can be raised and lowered and used for boring table.  $\frac{1}{4}$  inch groove for Delta miterage.

**Circular Saw**—Iron table  $12 \times 14\frac{1}{4}$  inches, with removable steel table insert for 5 inch diameter dado head,  $\frac{1}{2}$  inch wide slots on both sides of blade for miterage. Table raises and lowers, also tilts 45 degrees to left. Atkins 6 inch diameter saw, A-Z teeth, rips or cross cuts pieces  $1\frac{1}{4}$  inches thick. Miterage  $1\frac{1}{2}$  inches high, 6 inches wide, graduated 0 to 60 degrees to either side. Also used on sanding table for sanding plain and compound miters; can be used as a protractor in laying out work. One plain and one bent stop rod with clamp for cutting pieces accurately to length. Rip gauge  $1\frac{1}{4}$  inches high, 16 inches long, can be attached to either side of saw. Saw blade guarded on all sides underneath table. Scoop-like section throws saw dust away from machine.

**Scroll Saw**—With tilting table and plain 12 inch capacity frame, six each Nos. 3 and 4 pin end blades and endless V belts.

*Prices Subject to Market Changes*

*Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect*

## DELTA-HANDI-SHOP ACCESSORIES

**Jointer Subbase**

Combination chute and subbase for jointer; 4 in. jointer can be mounted on motor base of Handi-Shop as shown. Ample provision to leave out shavings. Quickly attached in T-slot of base. Small 1 $\frac{1}{8}$  inch diameter pulley included so that No. 50 Handi-Shop "V" belt can be used and driven from No. 172 double pulley, which is already on Handi-Shop.

No. 309—With 1 $\frac{1}{8}$  inch diameter pulley; shipping weight 10 lbs.  
.....Each \$2.50

**New Delta Miterage**

No. 180—Fits any  $\frac{3}{8}$  x  $\frac{1}{2}$  inch wide groove; has graduations and adjustable stop rod and clamp; shipping weight 1 $\frac{1}{2}$  pounds....  
.....Each \$2.25

**5 Inch Dado Set**

No. 135—Has two  $\frac{1}{8}$  inch wide outside cutters, and one  $\frac{1}{4}$  inch wide and one  $\frac{1}{8}$  inch wide inside cutters; will cut these grooves,  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$  and  $\frac{5}{8}$  inch wide; shipping weight 2 $\frac{1}{4}$  pounds.....Per Set \$9.00

**Combination Guard**

No. 186—Combination swing and splitter guard; will fit any 1929 and 1930 model Delta 6 inch saw; shipping weight 8 ounces.....Each \$2.25

**Tool Support Base**

No. 176—Has  $\frac{1}{2}$  inch diameter hole for tool supports with lock bolt as shown; clamp plate washer, bolt and nut also included; shipping weight 2 lbs.  
.....Each \$1.50

**Double Tool Support**

No. 179—Extra wide tool support with  $\frac{1}{2}$  inch diameter shanks, 18 inches wide for long turning; shipping weight 4 pounds.....  
.....Each \$2.50

No. 177

No. 178

**Narrow Tool Support**

No. 177—Narrow tool support, has  $\frac{1}{2}$  inch diameter steel shank; very strong; 3 inches wide; shipping weight 8 ounces.Each \$0.95  
No. 178—Wide tool support has  $\frac{1}{2}$  inch diameter steel shank exceedingly strong yet not clumsy; 6 inches wide; shipping weight 12 ounces.....Each \$1.10

*Prices Subject to Market Changes*

## DELTA HAND-SHOP ACCESSORIES

## Drill Chuck

No. 120—Holds up to  $\frac{1}{2}$  in diam. drills; fits close to motor, no overhang; fits any  $\frac{1}{2}$  inch diam. shaft; shipping weight  $1\frac{1}{4}$  pounds.....Each \$2.50

No. 138

No. 141

## Drive Center

No. 138—With replaceable center pin; fits any  $\frac{1}{2}$  inch diam. shaft, 4 milled teeth; shipping weight 4 oz.....Each \$1.50

## Cup Center

No. 141—Hardened and well made; fits tail stock spindle; has  $\frac{1}{2}$  inch diam. hole, center pin replaceable; shipping weight 4 oz.....Each \$1.00

## Face Plate

For large face plate work; fits any  $\frac{1}{2}$  inch diam. shaft. With 2 Allen set screws.

No. 142—Diameter 3 inches; shipping weight 1 pound..Each \$1.10

## Screw Center Plate

No. 140—For turning small, delicate work; fits any  $\frac{1}{2}$  inch diam. shaft;  $1\frac{1}{2}$  inch diam. body; shipping weight 8 oz..Each \$1.50

## Emery Wheel Arbor

Left hand flange part of body compels wheel to run true.

No. 118—Fits any  $\frac{1}{2}$  inch diam. shaft; shipping weight 12 oz.....Each \$1.25

## Allen Extension Wrench

Length 6 in.,  $2\frac{1}{2}$  in. wide.

No. 192—Fits any  $\frac{1}{8}$  inch diam. Allen hollow head set screw; shipping weight 5 oz..Each \$0.25

## Combination Pulley

Drives 6 inch Delta circular and Giant scroll saw at proper speed. No changing of pulleys required.

No. 172—Fits  $\frac{1}{2}$  inch diam. motor shaft; shipping weight 1 pound.....Each \$0.75

## Circular Saw Belt

V belt for driving 6 inch Delta circular saw. Delivers maximum power to blade.

No. 53—Fits No. 172 double pulley; shipping weight 2 ounces.....Each \$0.75

## Steady Rest

Prevents springing and vibrating of long small diameter stock.

No. 108—Fits any Delta 9 inch lathe; shipping weight  $3\frac{3}{4}$  pounds.....Each \$2.75

Prices Subject to Market Changes

Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect

## COMBINATION SAW AND JOINTER MOTOR DRIVEN UNIT

## Delta 8 Inch Circular Saw and 4 Inch Jointer

## Without Motor

Complete and self-contained; handy and practical in operation. Both jointer and circular saw mounted on a stand of heavy steel.

Jointer and circular saw are driven individually by means of two "V" belts and by the same motor. Possible to operate both machines at same time or any of the two separately.

If there is a large amount of circular saw work to be done and the jointer is not needed, it is only necessary to take off jointer belt from the motor drive pulley.

Both machines so placed that there is no interference of any kind with one another. Table of circular saw is sufficiently high to clear the jointer and its fence. Saw table tilts to right and away from jointer; fence of jointer can be tilted for bevel cuts without interference with the other machine.

A chute carries the shavings of the jointer away from machine. The whole unit runs smoothly and quietly. It may be placed in center of room, thus enabling cutting of long pieces. It is portable and can be carried to the job, or out in the open, and can be run from any light socket.

Easy to mount and line up any motor, as full directions come with stand. For average and production work we recommend a  $\frac{1}{2}$  H. P. 1750 R. P. M. constant speed type motor. (Use a  $\frac{1}{4}$  or  $\frac{3}{8}$  H. P. motor for light work.)

No. 350—Combination unit with No. 318, 8 inch circular saw, No. 300, 4 in. jointer, No. 356 stand, double pulley with  $\frac{3}{4}$  in. bore, No. 330 "V" belt and No. 307 "V" belt; motor and aluminum guards not included; shipping weight 150 pounds.....Each. \$60.50

*Prices Subject to Market Changes*

## DELTA 4 INCH JOINTER UNIT

## Without Motor

This compact sturdy machine is not only neat in appearance, but dependable and speedy in operation. Mounted on a rugged and heavy steel stand. Any  $\frac{1}{4}$  H.P. constant speed motor will give ample power for continuous work. Motors are easily mounted (full directions furnished).

Chute carries away shavings, which may be collected by placing box at rear of machine. Easily moved about and taken to the job. No need to first build a stand. Every patternmaker, assembler or finisher should have one alongside his bench.

No. 296—Jointer unit as shown with steel stand, "V" belt No. 307, 5 inch motor pulley No. 322 with  $\frac{1}{2}$  inch bore, and chute except that motor and aluminum guard are not included; shipping weight 74 pounds ..... Each \$32.50

## DELTA 8 INCH CIRCULAR SAW UNIT

## Without Motor

This unit is self-contained and very practical; it has the same heavy steel stand as used for the 4 inch jointer, except that the chute is not required. Nearly every shop can use this practical and dependable machine. It can be placed in center of room for cutting long and large boards without interference. Motors are easily mounted (direction furnished). For average and production work we recommend a  $\frac{1}{2}$  H.P. constant speed motor, but for light work a  $\frac{3}{4}$  or  $\frac{1}{2}$  H.P. motor may be used.

No. 328—Circular saw unit, as shown, including steel stand, 5 inch motor pulley No. 322 with  $\frac{3}{4}$  inch bore, "V" belt No. 330, except that motor and aluminum guard are not included; shipping weight 97 pounds ..... Each \$32.00

*Prices Subject to Market Changes*

*Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect*

**DELTA 4 INCH JOINTER**

Indispensable for work within its capacity, and for such work it will be found even better, more handy, and more speedy than large expensive machines. Ideal for patternmakers, furniture and cabinet-makers, piano instrument factories, sash and door mills, experimental and development departments, maintenance and repairmen, assembly and fitting rooms, home workshops and for many other purposes.

Can be easily moved about and run from any light socket. May be connected to any constant speed motor, a  $\frac{1}{4}$  H. P. being more than sufficient.

Note the long graduated fence and large rabbet arm.

Length of table 20 inches over all; fence tilts fully  $45^\circ$ .

**No. 300**—With 3 high speed knives, small pulley, graduated fence, but not including aluminum guard; shipping weight 43 pounds.....Each **\$25.00**

**No. 303**—Aluminum guard with pin and spring; shipping weight  $1\frac{1}{4}$  pounds.....Each **\$2.50**

**Note**—4 inch jointer can be attached to motor base of Handi-Shops and No. 70 and No. 160 units by means of a combination sub-base and chute as shown on page 130.

**DELTA 8 INCH CIRCULAR SAW**

Carpenters, cabinetmakers, repairmen, signpainters, window-trimmers, stage hands, designers, tile-layers, experimenters, and patternmakers will find this saw a dependable and willing worker. In shipping departments, dry kilns, lumber yards and home workshops, it will save time and its cost over and over again. Equipped with a bakelite wheel it can be used for cutting tile, hardened steel, aluminum, or brass shapes and tubings, will do ripping, cross-cutting, grooving, rabbeting, plain and compound mitering to exact length, dadoing, cutting mouldings, tenoning, plain or angular slotting, etc.

Size of table  $14 \times 17$  inches; can be tilted fully  $45^\circ$  to right; rip gage extends clear across table and is  $1\frac{1}{4}$  inches high,  $18\frac{1}{2}$  inches long; miterage  $1\frac{1}{2}$  inches high, 6 inches wide, graduated  $0^\circ$  to  $60^\circ$  on both sides.

**No. 318**—With 8 inch A-Z blade, elevating screw, miterage, rip gage and small pulley, as shown; shipping weight 66 pounds.....Each **\$25.00**

*Prices Subject to Market Changes*

# ACCESSORIES FOR DELTA 4 INCH JOINTER AND 8 INCH CIRCULAR SAW

## Swing Guard for 8 inch Circular Saw

Made of cast aluminum and swings on a rugged pivot yoke. Remains vertical when table is tilted and can be removed or swung out of way. Front is open with clear view to cut to a marked line. Offers least interference when in use.

Wide enough to protect dado heads up to  $\frac{3}{4}$  inch wide. Allows cross-cutting of boards 12 inches wide and ripping of very wide boards, as there is no interference on right side of blade. Distance from arm to left side of blade  $6\frac{1}{2}$  inches. Can be attached in a few minutes. No holes to drill.

No. 320—With all bolts, collars, etc.; shipping weight 7 pounds.  
.....Each \$7.50

## 6 inch Dado Set

No. 333—Has two  $\frac{1}{8}$  inch wide outside cutters and one  $\frac{1}{4}$  inch wide and two  $\frac{1}{8}$  inch wide inside cutters; will cut these grooves  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$  and  $\frac{3}{4}$  inch wide; has  $\frac{5}{8}$  inch hole; shipping weight  $3\frac{1}{4}$  pounds.  
.....Per Set \$12.00

## 5 inch Motor Pulley

Drives jointer or 8 inch circular saw. Made with  $\frac{1}{2}$ ,  $\frac{5}{8}$  and  $\frac{3}{4}$  inch bore. Specify which.  $\frac{3}{4}$  inch bore has  $\frac{1}{8}$  inch keyway.

No. 322—5 inch pulley; shipping weight  $1\frac{1}{2}$  pounds...Each \$0.75

**Note**—Will furnish  $\frac{1}{2}$  inch bore unless otherwise specified.

## 5 inch Double Pulley

For unit No. 350 made with  $\frac{1}{2}$ ,  $\frac{5}{8}$  and  $\frac{3}{4}$  inch diameter bore. Specify which.  $\frac{3}{4}$  inch bore has  $\frac{1}{8}$  inch keyway. Pulleys  $1\frac{1}{4}$  inches apart.

No. 358—5 inch double pulley; shipping weight  $2\frac{1}{2}$  pounds.  
.....Each \$1.50

**Note**—Will furnish  $\frac{3}{4}$  inch bore unless otherwise specified.

No. 307

No. 330

## "V" Belt for 4 inch Jointer

No. 307—Most fool-proof belt drive made; more efficient than gears (98%); fits No. 358 and No. 322 pulley; shipping weight  $\frac{1}{2}$  pound.....Each \$1.25

## "V" Belt for 8 inch Circular Saw

No. 330—Will not slip and is easy on bearings; same as No. 307, only longer; shipping weight 10 oz. ....Each \$1.25

**Prices Subject to Market Changes**

**Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect**

## DELTA ATTACHMENTS FOR SANDING AND BORING

## Delta Sanding Disc

The working and finishing of wood by the modern method of sanding has become widespread in the wood working industry. The fine finish obtainable with or against the grain and the saving of time and effort are but two of its many advantages. For successful sanding work it is essential to have a sufficiently large disc and an easily and quickly tilted table to support the work. (See No. 147 Table listed below).

**Note**—Short U bed instead of regular lathe bed.

Simply lay out any regular or irregular shaped design, then cut off roughly the biggest "waste" pieces with either circular saw or scroll saw, and with the aid of this sanding disc and table, simply finish smoothly and exactly to the line.

**No. 151**—Sanding Disc, diameter  $8\frac{1}{2}$  inches; fits any  $\frac{1}{2}$  inch diameter motor shaft; shipping weight 3 pounds.....Each \$2.50

## DELTA COMBINATION BORING AND SANDING TABLE

**Note**—For illustration see cut of No. 151 Delta Sanding Disc shown above.

Will tilt fully  $45^\circ$  downward and  $15^\circ$  upward. Gives perfect support to work to be sanded.  $\frac{1}{2}$  inch wide x  $\frac{1}{8}$  inch deep slot allows use of No. 180 miter gage for sanding plain and compound miters to exact length.

Table can be raised and lowered. Fine for boring or routing operations. Quickly attached. Fits any Delta Handi-Shop. Use short U-bed No. 154 if table wanted for Nos. 70, 72, 75, 78 or 160 units. Table finely machined.

**No. 147**—Table 5x12 inches; shipping weight 11 pounds.....  
.....Each \$5.00

## DELTA SANDING DRUM

With bolt and nut for attaching to portable drill motor or regular lathe motor. For sanding irregular shapes, for sanding convex and concave surfaces, for smoothing and sanding inaccessible corners, drawers, closets and floors, and for removing paint and rust preparatory to welding, brazing or soldering.

Covered with thick layer of felt. Sanding paper quickly and easily changed. Sanding surface 2 inches wide,  $2\frac{1}{2}$  inches diameter.

**No. 200**—With one sheet each fine and coarse garnet paper and emery cloth; shipping weight 1 pound .....Each \$2.00

*Prices Subject to Market Changes*

# BENCH OILERS

Wide Mouth

Steel, Copper  
Plated

Heavy seamless steel domes, spring steel bottoms and machine cut threads. Collar, cap, bottom and nozzle are assembled without solder, which insures solid joints. One

inch opening allows easy filling. Plated inside and out. Interchangeable spouts.

## Straight Spouts

Nos.	Cap.	Dia.	Spout	Each
12	1/4	2 3/4	3	\$0.20
13	1/8	3 3/8	3	.23
13A	1/8	3 3/8	5	.25
14A	1/2	3 3/4	3	.32
14AA	1/2	3 3/4	5	.34
15A	1	4 1/4	5	.41

## With 9 inch Bent Spouts

Nos. ....	14	14B	16
Capacity, pints	1/2	1/2	1
Diameter, in...	3 3/8	3 3/8	4 1/4
Each .....	\$0.28	.36	.44

# POCKET OILERS

Perfect

For bicycles, guns, fishing tackle, typewriters, sewing machines, roller skates, etc.

Consists of tube, tip and cap. The tip throws only a few drops at a time, thereby avoiding loss.

Each .....\$0.35

# LUBRICATING OILS

Three-In-One

For lubricating light mechanisms, cleaning and polishing metal and wood, preventing rust and tarnish. Especially recommended for magneto bearings, the finest also for bicycles, sewing machines, guns, etc.

## In Bottles

Ounces .....	1	3	8
Each .....	\$0.15	.30	.60

## In Handy Cans

Flat tin oil can with sealing spout, can't leak, slips easily into hip pocket.

Ounces .....	1	3
Each .....	\$0.15	.30

## Pike

Perfectly pure, acidless, and non-drying.

Will not gum, nor corrode the most highly polished metal. Recommended for all purposes where a thin, pure oil is required as a lubricant or rust preventative. Also used for cleaning

and polishing all kinds of wood and metal surfaces and on oil stones for sharpening tools, etc.

3 oz. Cans.....Each \$0.30

Prices Subject to Market Changes

Delivery Prepaid Within 100 Miles—to Points Beyond Charges Collect

## RAWLPLUGS

Fibre Screw Anchors—Hold Screws Fast

"Wherever You Use a Screw—Use a Rawlplug Too"—Rawlplugs are fibre screw anchors used for holding wood screws in any kind of material such as plaster, brick, concrete, tile, etc. May also be used for filling worn screw holes where a handle or knob has been pulled out.

## The Household Kit

For the Handy Man

Contains a special Rawldrill and Toolholder for hanging pictures, putting up bathroom fixtures, mounting shelves, etc., and a supply of No. 8 Rawlplugs, nickel plated screws, screw eyes and screw hooks. Complete ..... Each \$0.50

## For the Complete Home Workshop or the Mechanic

Contractors Outfit packed in heavy gauge steel mechanics tool kit and contains following assortment: 100 each No. 8 x 1 in., 10x1 in., 12x1 1/4 in., 14x1 1/4 in. Rawlplugs; 25 each No. 3/8x2 in., 1/2x2 in. Rawlplugs; one Rawlplug and screw gauge; one tool ejector; three each No. 8, 10, 12 and 14

Rawldrills; one each No. 7/8x10 in., 3/4x12 in. Rawldrills; one No. 14 toolholder and instruction sheet.

Outfit complete ..... Each \$20.00

A combination paste, glue, adhesive—an all-purpose cement. For mending china, glass, wood, leather, porcelain, metal or fabrics. Waterproof, transparent, dries quickly.

Full directions with each tube.

Per Tube...\$0.25

## ACME QUALITY PAINTS

True economy in the use of paint does not consist in purchasing at the lowest price per gallon, but in being reasonably sure that the paint is honestly made and possesses in the fullest degree the qualifications above outlined. Low priced paint may last one to two years,—good paint four years or more. The cost of applying either is the same and is the largest item of expense. There is no economy, therefore, in buying at the lowest price per gallon. Years of service should be the consideration.

## New Era House Paint

In 28 shades besides black and white.  
Outside white, inside white, interior high gloss white.

1 gal.	½ gal.	1 qt.	1 pt.	½ pt.
\$4.00	2.10	1.15	.60	.35

## ACME QUALITY VARNISH

### Great Lakes Spar

This is a perfect varnish for all exterior and interior surfaces such as floors, linoleums, table tops, front doors, bath-rooms, window sills, automobiles, marine work and all other surfaces exposed to moisture and hard wear. Dries dust free in four to six hours and hard in twenty-four to thirty-six hours.

### Floor Roc

A popular floor varnish of medium body and good gloss. Light in color. It dries quickly and thoroughly. If drying conditions are favorable, it can be walked on, if necessary, twenty-four hours after job is complete. This does not mean over night.

## BRUSHING LACQUER

Rogers

The most marvelous finish of the century. Especially for the amateur. No preparation. Merely brush the beautiful colors on—right over any old or new surface. Forms a smooth, satiny, colorful coating. Dries hard, ready for use, in 30 minutes (or less).

And any person can use "Rogers"—it's so easy. Comes in cans, ready mixed, in 19 beautiful colors. Also black, white and clear. Sold on a "Money Back" guaranty.

## Popular Shades

White, ivory, black, Chinese red, turquoise, rich blue, lettuce green, forest green.

Size cans .....	1 qt.	1 pt.	½ pt.	¼ pt.
Each .....	\$1.95	1.10	.65	.40
Thinner Liquid—Size cans.....	1 qt.	1 pt.	½ pt.	¼ pt.
Each .....	\$1.70	.95	.55	.35

## Du Pont Duco

A pyroxylin product, the base of which is cotton. Nitration processes similar to those used in the manufacture of other Du Pont Products are utilized in making Duco. Brush Duco is identical in all essential characteristics with Spray Duco, used in automotive and industrial finishing, the only difference being a manipulation of liquids in order to permit of easy brush application.

Has a rich, satiny lustre and a hard, long-wearing surface. One of its most valuable characteristics is its quick-drying feature. Articles finished with Duco can be put back in use the same day.

May be applied over almost all types of surfaces. It is possible to intermix two or more shades of Duco to obtain any tone or tint desirable.

## Popular Shades

White, ivory, mandarin red, jade green, nille green, also stains.

Size cans .....	1 qt.	1 pt.	½ pt.	¼ pt.
Each .....	\$2.20	1.20	.70	.37
Thinner Liquid—Size cans.....	1 qt.	1 pt.	½ pt.	¼ pt.
Each .....	\$1.70	.95	.55	.32

**Note**—Prices are given only on the most popular shades. Prices on other shades will be quoted on request. Send for full shade color card and instruction book.

No. 4 mesh ( $\frac{1}{4}$  inch square); standard No. 23 wire; carried in stock in widths of 24, 30, 36 and 48 inches.

Per Square Foot.....\$0.05 $\frac{1}{4}$ **No. 2 Mesh**

No. 2 mesh ( $\frac{1}{2}$  inch square); standard No. 19 wire; carried in stock in widths of 24, 30, 36, 42 and 48 inches.

Per Square Foot.....\$0.04 $\frac{1}{2}$ **Prices Subject to Market Changes**

# **SCREEN WIRE CLOTH** **In Rolls of 100 Linear Feet**

14-MESH

## **Antique Bronze**

This bronze wire is an alloy of non-corrodible metals of which copper represents about 90 per cent, and tests have proven it to be more durable than pure copper when used for window and door screens.

Requiring no paint, lacquer or other protective coating, light and air have an unobstructed passage through these fabrics. Exposure to the weather simply darkens the color, rendering the cloth nearly invisible.

We specially recommend Antique Bronze Wire Cloth in cases where exposed to salt air.

Carried in stock in widths of 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 and 48 inches.

	Per 100 Sq. Ft.
Full rolls, 14 mesh.....	\$6.50
Full rolls, 16 mesh.....	6.90
Less than full rolls, 14 mesh.	
Per Square Foot.....	\$0.07
Less than full rolls, 16 mesh.	
Per Square Foot.....	\$0.07½

16-MESH

## **Pearl**

Is made of steel wire of unusual hardness protected by a metallic finish, which is the result of years of experiment. This imparts to the cloth remarkable durability and smoothness.

The metallic finish, at first lustrous—similar to silver—turns, after short exposure, to a shade of gray, rendering the wire almost invisible.

The cost of screening a building with Pearl Wire Cloth is but little more than if the ordinary painted material is used and the expense and annoyance of frequently repainting and replacing the wire is avoided.

Carried in stock in widths of 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 and 48 inches.

	Per 100 Sq. Ft.
Full rolls, 14 mesh.....	\$5.50
Full rolls, 16 mesh.....	6.00
Less than full rolls, 14 mesh.	
Per Square Foot.....	\$0.06
Less than full rolls, 16 mesh.	
Per Square Foot.....	\$0.06¼

## **Galvanoid**

Galvanoid is heavily electro-zincked after weaving, then a coat of transparent varnish is baked on. It is firm, durable and attractive, the best grade of zinc-coated cloth on the market. 14 mesh only.

Carried in stock in widths of 24, 26, 28, 30, 32, 34 and 36 inches.

Full rolls, 100 Square Feet.....	\$2.60
Less than full rolls. Per Square Foot.....	.03
